Edgenuity uses a colocation IO Data Center in Scottsdale AZ for all production servers hosting public information. The IO Data Center is SSAE16 compliant and Uptime Institute Tier-III certified. Edgenuity servers that host non-public information are protected by redundant high availability Palo Alto devices which includes threat protection, URL filtering and dynamic analysis of suspicious content (Wildfire service) Edgenuity uses Distributed Denial of Service DDoS prevention services from Akamai and Century Link for additional protection.

Physical Security: Our data center is SSAE 16 (formerly SAS 70) certified. The data center gives blended Internet service, multiple power grid access, fully redundant cooling systems and is designed to provide our customers with a level of assurance of corporate controls. All firewalls, switches, and servers in the production system are monitored for suspicious activity. Deloitte & Touche LLP, a leader in audit, tax, consulting, risk, and financial advisory services, conducted the IO SSAE 16 audit.

Physical security features that have been implemented at the data center include: locked access gate; locked facility with limited authorized access; key card access; key locked server room; retina scans; onsite security guard; and multiple sources of power and networks. In addition, hard key access control is enforced at Edgenuity's corporate office for all employees. All visitors must enter through a manned reception area, sign in, and be accompanied by an Edgenuity employee at all times they are in the building.

Network Security: All data for the Edgenuity solution is transmitted via SSL 2048 bit encryption, over the public Internet. All student data for the student information in the learning management system and student records (credits, transcripts, etc.) are stored on Microsoft SQL servers with no direct connection to the Internet.

Access to the Edgenuity servers can only be attained by authorized system engineers for software updates. The collocation facility is safeguarded by pass code and retinal scan security so that only authorized Information Technology members of Edgenuity staff can access hardware. User account privileges and permissions within Edgenuity are based on the minimum requirements to successfully perform their normal job duties.

District access is permission-based to control access to student data. The District Administrator(s) will determine the permissions by granting various rights only to specific sets of personnel. The Administrator can provide, revoke, and modify user rights as needed.

Edgenuity's system is monitored 24 hours per day / 7 days per week. Our Network Operating Center may be reached at any time to report system issues.
