Cybersecurity Framework Exclusion and Compliance Status

In reference to the Data Security clause of the agreement and the Cybersecurity Framework outlined in Exhibit "F", we wish to notify and detail specific exclusions pertaining to our current compliance status. While our organization actively employs the Center for Internet Security (CIS) Controls as guiding benchmarks for our cybersecurity practices, it is important to acknowledge that we have not yet achieved full compliance with all the controls encompassed within the three levels of the CIS framework.

Our cybersecurity approach is designed to be robust and evolving, with continuous improvement as a core objective. We are committed to progressing towards fuller compliance with the CIS framework, however, as of the date of this agreement, certain controls and standards within the framework are not fully implemented. This exclusion does not diminish our dedication to data security and the protection of Student Data, as we employ a range of administrative, physical, and technical safeguards tailored to our operational context.

Audit Clause Exclusion

Regarding the ARTICLE V.2 "Audits" clause in this agreement, we wish to propose an amendment due to our current operational capabilities. As of now, our organization is not equipped with a formal framework or the necessary resources to facilitate external audits of our systems, particularly in the context of the security and privacy measures for Student Data.

We would like to explicitly state the handling procedure for Student Data as provided by the LEA. All Student Data received from the LEA will exclusively be processed and stored on a third-party platform. This platform is not only integral to our service delivery but also adheres to the highest standards of data security.

It is important to note that we have a Data Processing Agreement (DPA) in place with this third-party provider. This agreement ensures that the handling of Student Data aligns with our mutual commitment to data protection and privacy. Furthermore, the third-party platform we utilize is certified with SOC2 Type 2. This certification underscores their adherence to rigorous standards for security, availability, processing integrity, confidentiality, and privacy of customer data.

Subprocessors

Article II, paragraph #5 "Subprocessors" will be deleted and replaced with the following:

Provider has entered into written agreement with a subprocessor performing functions for the Provider in order for the Provider to provide all the Services pursuant to the Service Agreement, whereby the Subprocessor agree to protect Student Data. This agreement will be provided to the LEA upon request if necessary.
