DESCRIPTION OF SERVICES

INSERT DETAILED DESCRIPTION OF SERVICES HERE.

EXHIBIT "A"

OnDataSuite is comprised of three components: OnPoint, OnPar, and OnView. Districts are given an initial overview of the product and can take part in online trainings throughout the year. Districts can schedule onsite trainings with a fee depending on length of time and travel accommodations. Below is a brief overview of each component of OnDataSuite.

OnPoint

OnPoint® (formerly PEIMS DATA +) is a unique tool designed by Aloe Software that makes it easy to access thousands of reports and records with just a few clicks. Whether you need a compliance report to meet legal requirements or a custom data report to help you make an informed decision, OnPoint® can help you with just a few quick clicks.

OnPoint® is a data warehouse that aggregates data from multiple educational data sources and presents them in the form of detailed reports, interactive dashboards, and other visualization tools using a powerful analytics software. Data can be used to measure the progress of each student, school and district against various district, state, and federal performance criteria.

Data demands on a district can be a daunting task. OnPoint® gives you the power to create and share custom reports within your district with minimal training and cost.

Trending: OnPoint® is capable of using data sources from 1999 and beyond. Allowing LEA's to identify trends, making the planning process more meaningful. Data sources include PEIMS, STAAR 3-8, STAAR EOC, ACT Plan, ACT Explore, TAKS, TELPAS, GASB Audit Data Feed, and the TEA Cohort Student List.

Dashboards: Available at every level; District, Campus, Student, Staff and Teacher dashboards allow users to view their data on a whole. Student dashboards list every demographic data, attendance, discipline, test scores, academic performance ratings and grades.

Data Driven Decisions: Providing decision-makers with tools and information necessary to make informed, data-driven decisions about education.

Simple: The entirely on-line engine means no software to install or maintain.

OnPar

With over 1,000+ reports, OnPar® is a powerful multiyear trend analysis and projection tool that allows you to compare your district or campus assessment and financial data side by side with other Texas districts or campuses. OnPar® empowers data driven decisions with actionable data, providing multiple graphing capabilities allowing you to visualize your data. Easily find trends in your data.

OnPar® is hands down the easiest to use trend analysis and projection tool available for school district administrators to use to compare performance across statewide local education agencies. OnPar® uses the well-known public released Texas Academic Performance (TAPR) reports as its data source to provide you with multi-year student assessment performance and financial data.

Our intuitive web based interface makes it easy to create limitless assessment and financial data comparison reports that can be saved, shared, graphed or exported without the need to search through each TAPR report individually.

And the best part... Using OnPar® requires virtually no training to get started. This means you can start using the system TODAY!

OnPar provides districts with a dashboard display of their latest released TAPR results. Graphical widgets provide at a glance reporting for the following key indicators:

- STAAR 3-8 Performance (Current & Previous Year)
- STAAR EOC Performance (Current & Previous Year)
- Employee Overview Data
- Ethnic Distribution
- Total Student Count
- Graduate Count

OnView® is a feature of OnDataSuite® that allows districts to automatically publish their OnPar® Dashboard items to their district website for public viewing. The OnView® module pulls publicly released Texas Academic Performance Reports (TAPR) data directly from the OnPar® system and displays the information in an interactive, graphical format.

Security

The OnView® dashboard will display ONLY publicly released TAPR results so there is no danger in publishing confidential student data
