CPS G-Suite Protections

Backupify:
Ensure each CPS G-Suite account is backed up. Each user can restore their own files, by clicking on Backupify in the G-Suites App Waffle

CloudLock:
Provides an extra layer of security around CPS G-Suite Domain. This envelope of security continuously monitors and potentially blocks inappropriate access and sharing of sensitive data

AirWatch:
Allows CPS Staff to install CPS G-Suite on personal device. This will allow CPS to ensure that CPS Email and Documents are secure and can be removed once the phone has been compromised or Staff leaves the district.

CPS is serious about security and data privacy
