# Quill.org Security and Data Breach Response Plan

Last Updated: December, 11, 2019

## Summary

Quill.org takes security and data protection very seriously. This document outlines our approach to data security and our response strategy in the event of a security or data breach.

## Quill.org Data Use

Quill values the data privacy of all of our users: students, teachers, and administrators. We purposefully collect very little Personal Identifiable Information (PII) so that even in that case of a security breach, there is very little information to lose. The only PII we collect are name and email address (and email address is optional for students). We also delete all inactive student data 4 years after the date of last login. For teachers and schools that pay for premium accounts on our site, we use a secure third-party payment processor named Stripe. We do not store any credit card data on our servers. We only store a randomized token reference to the credit card in Stripe's secure system.

We do collect information for debugging/troubleshooting purposes such as IP address, web browser used, and operating system. This is purely for support purposes. Our employees will not access your Personal Information without a specific reason to do so. Often this reason will be to better serve you in the event of a support issue (for example, we may look up your operating system and web browser if you write to us saying you are having a problem with the website).

Quill.org does not and will not sell any of its data to third-parties or advertisers.

Quill abides by data security best practices. All of our websites and tools use secure SSL connections over HTTPS to encrypt data in transport. Our websites are hosted within the secure cloud providers Amazon AWS and Google Cloud Platform and we use their IAM security tools to restrict access to our resources. All passwords in our system are encrypted using modern password encryption techniques. For our internal tools, we use password generators and managers to generate strong random passwords and we do not re-use these passwords. Our databases are encrypted-at-rest, providing an extra layer of security.

## Reporting an Incident

If you believe you have found a security or data breach issue on Quill, please email [security@quill.org](mailto:security@quill.org) with the subject line "Security Incident: [Insert Description]", replacing "[Insert Description]" with a descriptor of the issue. Please include as much information as possible in the body of the email to aid our investigation. We commit to investigating every security issue reported in this channel. If we determine that a security or data breach has occurred, we will begin the following steps.

## **Security or Data Breach**

If we find a security or data breach, either through an outside party or our own investigations, we will begin an “all hands on deck” situation within the company. Our internal documents outline this process in further detail, but the general steps are as follows:

1. Confirm that the security issue or data breach exists.
2. Determine the scope of the breach.
3. Develop a plan to close the source of the breach.
4. Close the source of the breach.
5. Notify relevant external users (see next section).
6. Establish remediations to prevent similar events in the future.

## **Public Response and User Communication**

As a company, Quill.org aims to be as transparent as possible with our users. We also recognize that it is dangerous to publicly disclose open security issues, since that could allow more bad actors access.

Quill.org commits to notify users affected by a data breach within 48 hours of the security incident ending. In other words, 48 hours after the vulnerability has been closed.

This notification will include:

1. Timeline of the event.
2. Description of the security issue.
3. Description of the data that was taken.
4. Remediations to prevent this in the future.

## **Questions**

If you have any questions about this policy, please email [security@quill.org](mailto:security@quill.org).
