DESCRIPTION OF SERVICES

Florida Ready to Work provides research-based, career contextualized training (curriculum) to develop mastery of the common, transferable skills that are the foundation for success in the classroom and on the job. The training (curriculum) includes online, quasi-adaptive instruction in foundational employability skills including:

- *Applied Math – Use of workplace math – four basic functions of math – to communicate information and problem solve (i.e. calculate percentage discounts and mark-ups).*
- *Reading for Information – Use of workplace text to communicate information and problem solve (i.e. emails, manuals, memos, policies).*
- *Locating Information – Use of workplace graphics to communicate information and problem solve (i.e. spreadsheets, charts, graphs, instrument gauges).*

The program also provides blended – online and classroom-based – training (curriculum) to develop essential soft skills including:

- *Conveying Professionalism – Dependability, courtesy, attitude, motivation, personal accountability, and time management.*
- *Communicating Effectively – Verbal and nonverbal communication and listening; use of communication tools including email etiquette, cell phone, and social networking; resolving conflict; and acknowledging criticism.*
- *Promoting Teamwork and Collaboration – Teamwork skills and interactions, benefits of diversity and sensitivity to differences, accepting responsibility, and leadership.*
- *Thinking Critically and Solving Problems – Innovation, creativity, flexibility, overcoming adversity, goal setting, and critical thinking strategies.*

The online training (curriculum) is self-paced and easily implemented as an on-your-own, classroom, lab and/or extension activity. An embedded placement test personalizes and targets instruction to close individual-specific skills gaps. Learner interactions and posttests at each level / module of instruction facilitate monitoring of student progress, measuring learning gains, and determining readiness for the proctored assessments required to earn the credentials.

Those who complete the program may earn the Florida Ready to Work Credential and/or the Florida Soft Skills Credential. Both credentials are signed by the Governor and recognized as a common measure of readiness for most jobs, across industry sectors, by employers large and small.

To earn the Florida Ready to Work Credential, students must pass three proctored, online assessments – applied math, reading for information and locating information. To earn the Florida Soft Skills Credential, students must pass one proctored, online assessment – essential soft skills. Based on career contextualized scenarios, the assessments measure not just what students know, but more importantly, their ability to apply their skills. The assessments are immediately scored, and the credentials may be downloaded and printed or emailed to employers in real time.

Florida Ready to Work maintains a staffed help desk for technical assistance and local coordinators throughout the state to assist with any hands-on trouble shooting if needed.

(This is a free text field that the parties can use to add or modify terms in or to the DPA. If there are no additional or modified terms, this field should read "None." 618-1 /4715859.1)

Provider shall employ the following data security infrastructure practices:

- Provider's online products shall be housed in Amazon Web Services (AWS) data centers that are monitored 24 hours per day.
- All system components including, but not limited to, physical access, infrastructure, server performance and space, individual services, and application pools shall be monitored, and alerts generated upon any event that may impact the user experience.
- The system shall be safeguarded by public key infrastructure encryption via SSL 2048-bit key length certificates from trusted third-party certificate authorities. Information shall be encrypted at rest and transmitted over encrypted HTTPS protocols.
- Backups shall be stored on encrypted media.
- Backups of all system components and data shall be maintained. The backups shall be run daily, and stored online and shall be available for restoration, if necessary.
- All network equipment, database servers, and web application servers shall be configured to be highly available via the use of multiple availability zones to provide failover in the event of a complete loss of one data center.
- Provider shall maintain firewall systems for the protection of information assets. The firewalls shall be configured following the standard of least privilege. No traffic that is not specifically known and approved shall be allowed through the firewalls.
- Provider shall maintain separate layers of security to increasingly protect privileged data from external threats. The firewalls shall use deep packet inspection to verify that known data types are not hiding a malicious payload. Attacks against the system shall be automatically blocked at the firewall based on rules defined for known attack patterns such as IP address and port scans, password attacks, and other threats.
- Unique identification through user name and passwords shall be employed. Passwords shall be between 8 and 16 letters/numbers, must contain one capital letter, one lowercase letter, one number, one special character, and shall not contain first or last names nor email address.
- Hierarchical organization and user management tools shall govern and safeguard access to the system and user information / data. The hierarchical structure shall be based on customer-defined business rules. End users shall be pre-enrolled to access the system. Upon enrollment, permissions shall be automatically assigned and linked to a unique username / password combination.

- Each user shall be required to have a unique identifier. Accounts shall not be shared. User identifiers shall not be reused. User accounts shall have the ability to be disabled by a privileged customer administrator and also disabled in accordance with contractual commitments.
