Neither failure nor delay on the part of any Party in exercising any right, power, or privilege hereunder shall operate as a waiver of such right, nor shall any single or partial exercise of any such right, power, or privilege preclude any further exercise thereof or the exercise of any other right, power, or privilege.

Notwithstanding the foregoing, if such provision could be more narrowly drawn so as not to be prohibited or unenforceable in such jurisdiction while, at the same time, maintaining the intent of the Parties, it shall, as to such jurisdiction, be so narrowly drawn without invalidating the remaining provisions of this DPA or affecting the validity or enforceability of such provision in any other jurisdiction.
6. **Governing Law; Venue and Jurisdiction**. THIS DPA WILL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF THE LEA, WITHOUT REGARD TO CONFLICTS OF LAW PRINCIPLES. EACH PARTY CONSENTS AND SUBMITS TO THE SOLE AND EXCLUSIVE JURISDICTION TO THE STATE AND FEDERAL COURTS FOR THE COUNTY OF THE LEA FOR ANY DISPUTE ARISING OUT OF OR RELATING TO THIS DPA OR THE TRANSACTIONS CONTEMPLATED HEREBY.
7. **Successors Bound**: This DPA is and shall be binding upon the respective successors in interest to Provider in the event of a merger, acquisition, consolidation or other business reorganization or sale of all or substantially all of the assets of such business. In the event that the Provider sells, merges, or otherwise disposes of its business to a successor during the term of this DPA, the Provider shall provide written notice to the LEA no later than sixty (60) days after the closing date of sale, merger, or disposal. Such notice shall include a written, signed assurance that the successor will assume the obligations of the DPA and any obligations with respect to Student Data within the Service Agreement. The LEA has the authority to terminate the DPA if it disapproves of the successor to whom the Provider is selling, merging, or otherwise disposing of its business.
8. **Authority**. Each party represents that it is authorized to bind to the terms of this DPA, including confidentiality and destruction of Student Data and any portion thereof contained therein, all related or associated institutions, individuals, employees or contractors who may have access to the Student Data and/or any portion thereof.

Security Plan Description

Securly Information Security Standards

We begin with company core values and a mission that support data privacy and information security and we carry that culture through all aspects of our business including business continuity and our written information security program.
2. **Information Security Policies**
 - a. Written Information Security Policies (WISP) policies cover all categories of the NIST 800-53 Standard and are approved by Securly senior management. Policies are documented and published among all relevant personnel.
 - b. Employees and contracted third parties are required to comply with Security policies relevant to their scope of work.
 - c. New employees receive training on confidentiality obligations, information security, compliance, and data protection.
 - d. Employees receive regular training updates, which cover Securly Information Security policies and expectations.
 - e. Where required, policies are supported by associated procedures, standards, and guidelines.
 - f. Information Security policies are reviewed annually and updated as needed to reflect changes to business objectives or risk and updates in regulatory requirements.
 - g. Information Security policies are stored, maintained, updated, and published in a centralized, online location.
3. **Organization of Information Security:** Internal Organization: Securly has established an Information Security team and assigned responsibility for all aspects of information security.
4. **Human Resources Information Security**
 - a. Prior to Employment, Securly performs background screening of new hires including job history, references, and criminal checks (subject to local laws). Securly requires all new employees to sign comprehensive non-disclosure and confidentiality commitments.
 - b. During Employment, Securly maintains an information security awareness and training program that includes new hire training. Information Security awareness is enhanced through regular communications using company-wide communications, as necessary. The organization maintains records of security awareness training sessions.
 - c. Access to information assets is removed in a timely manner for users no longer requiring access to perform their job responsibilities.
5. **Asset Management**
 - a. Securly assigns ownership for all information assets.

- b. Securely maintains an information assets classification policy and classifies such assets in terms of its value, legal requirements, sensitivity, and criticality to the organization.
- c. Desktops, laptops, network devices, and cloud resources utilize encryption technology.
- d. Securely maintains a data disposal and destruction policy that covers the disposal of electronic assets and associated media.

6. Access Control

- a. Business Requirements for Access Control: All access controls are based on least privilege access principle.
- b. User Access Management: Securely uses a formal user access registration for access privileges to be provisioned. Privileged access accounts are separately managed and controlled. User access privileges are reviewed and updated regularly. Access to information assets is removed in a timely manner for users no longer requiring access to perform their job responsibilities.
- c. User Responsibilities: Securely maintains an "Acceptable Use" policy that outlines requirements for the use of user IDs and passwords. Securely publishes and maintains a password management standard. Strong passwords are enforced through global policy. Strong authentication practices are used to control access to production and development environments.

7. Cryptography

- a. Encryption is used to protect against unauthorized access, tampering, disclosure, and modification of sensitive data. Restricted and Confidential data is stored using AES 256-bit encryption when stored on any media type. Encryption is used for securing Securely Restricted and Confidential data, including customer data, during transmission, and exchange as required by the Securely Data Classification and Handling Policy and relevant legal requirements.
- b. Where encryption is not technically feasible, other approved compensating controls must be in place.

8. Physical and Environmental Security

- a. Securely has established measures to protect the physical environment supporting information assets.
- b. Physical access to information assets and company workspaces is restricted through the use of key cards, key codes and/or physical keys.

- d. Visitors to company workspaces must be accompanied at all times.

9. Operations Security

- a. Operational procedures and responsibilities are defined with the organization. Technical security architecture is based on the principles of defense in depth, least privilege, and approved security practices consisting of conceptual, logical, technical, and physical layers.
- b. Endpoint Anti-Virus (AV) technology is deployed and secured such that users cannot modify or disable protection.
- c. To ensure the ongoing availability of critical data, management has established a schedule of backups and data redundancy.
- d. Backups and replications are monitored for failures, and resolved in a timely manner.
- e. Production information systems are audited for internal vulnerability regularly and for external vulnerability at least quarterly.

10. Communications Security
