Notwithstanding the foregoing, if such provision could be more narrowly drawn so as not to be prohibited or unenforceable in such jurisdiction while, at the same time, maintaining the intent of the Parties, it shall, as to such jurisdiction, be so narrowly drawn without invalidating the remaining provisions of this DPA or affecting the validity or enforceability of such provision in any other jurisdiction.

GLOBE Mission EARTH: Fusing GLOBE with NASA Assets to Build Systemic Innovation in STEM Education is a collaboration among GLOBE Partners across the United States. The lead organization is the University of Toledo (UT), and the core partners are Boston University (BU), Tennessee State University (TSU), WestEd/University of California Berkeley (WestEd/UCB) and NASA Langley Research Center (LaRC). We are focused on engaging K-16 teachers and students, especially those underrepresented in STEM careers, in authentic science. GLOBE Mission EARTH (GME) brings together scientists and science educators to engage K-16 educators and students with GLOBE and NASA-infused learning materials and experiences following research-based best practices. By providing professional development and ongoing support to teachers and students in implementing these materials and experiences, building partnerships to leverage resources, and strategically expanding the work, GME ensures sustainability. The materials and experiences incorporate design principles that make them appropriate for all student populations, especially those currently underrepresented in STEM careers — the primary focus of all our efforts. In Phase 2 of Science Activation funding we will spread these practices to other partners and other parts of the country. We have tested our dissemination approaches in New Mexico and several locations in Ohio. In the coming five years, the project will expand its work, intentionally partnering with school districts, state educational agencies, informal learning organizations, key networks, and other GLOBE Partnerships, as well as other SciAct members. These efforts will help to leverage existing professional development infrastructures and support structures that will enable replication and dissemination of the work and ensure long-term sustainability. In this vein, GME provides many of its activities online through webinars, coordinates virtual teacher professional development and virtual student conferences, and will continue to build upon these efforts as we spread GME to more areas in the US. The mission of GLOBE Mission EARTH is to systematically embed NASA assets, infused with GLOBE — Global Learning and Observations to Benefit the Environment — into the curricula of K-16 schools, colleges and universities. We do this by leveraging existing partnerships and networks with support of school districts and state departments of education, as a systemic, effective, and sustainable approach to meeting NASA's science activation objectives.
