

There is no "Service Agreement" between the Provider and the LEA and there is no "Student Data", as defined in either Exhibit C or Exhibit G, that is collected by the Provider from the LEA. The Provider collects information directly from students through its optional survey, which is provided directly to students of the LEA who are interested in connecting with higher education and other education and career opportunities. This survey is not administered under any Service Agreement with the LEA. The students who optionally decide to complete the survey can affirmatively opt to share their information with Providers clients who are organizations that offer educational, community involvement, extracurricular, and career opportunities, products and services.
