Notwithstanding the foregoing, if such provision could be more narrowly drawn so as not to be prohibited or unenforceable in such jurisdiction while, at the same time, maintaining the intent of the Parties, it shall, as to such jurisdiction, be so narrowly drawn without invalidating the remaining provisions of this DPA or affecting the validity or enforceability of such provision in any other jurisdiction.
- 6. Governing Law; Venue and Jurisdiction.** THIS DPA WILL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF THE LEA, WITHOUT REGARD TO CONFLICTS OF LAW PRINCIPLES. Such notice shall include a written, signed assurance that the successor will assume the obligations of the DPA and any obligations with respect to Student Data within the Service Agreement. The LEA has the authority to terminate the DPA if it disapproves of the successor to whom the Provider is selling, merging, or otherwise disposing of its business.

8. **Authority.** Each party represents that it is authorized to bind to the terms of this DPA, including confidentiality and destruction of Student Data and any portion thereof contained therein, all related or associated institutions, individuals, employees or contractors who may have access to the Student Data and/or any portion thereof.

Data Security Framework and Protocols:

Cybersecurity Risk Assessment and Management

- Cybersecurity comes in all shapes and sizes. It is wholly dependent on the type and amount of data that is being collected, managed, stored, and utilized in order to deliver a particular service. Kids Discover Online offers an online library of science, social studies, and nonfiction reading for elementary and middle school aged students. In order to provide this service, Kids Discover Online requires a minimal amount of student data or teacher or principal data. In some instances, Kids Discover Online may not require the collection of any student data or teacher or principal data whatsoever.
 - Collecting a minimal amount of student data or teacher or principal data is the first step in mitigating cybersecurity risk.
 - This minimal amount of collected data also simplifies Kids Discover's management and protection of such data, and therefore informs the software, hardware, and overall systems in place to achieve strong, reliable cybersecurity.
 - It also informs the limited number of Kids Discover personnel that have (and need) access to such data at any given time, along with the extent of proper training that those individuals receive.

Data Collection and Protection

- The Personally Identifiable Information that Kids Discover Online may collect is limited to the following student data or teacher or principal data:
 - Student Data PII
 - First Name and Last Name
 - NOTE: Kids Discover Online does not collect student email addresses, and explicitly prohibits the collection of Student PII other than First and Last Name. For example, NONE of the following examples of Student PII are collected:
 - Name of student's parent or other family members
 - The physical address of the student or student's family
 - A personal identifier, such as student's social security number or student number
 - Student's date of birth
 - Student's attendance
 - Teacher or Principal PII
 - First Name and Last Name
 - Email Address
 - Job Title or Role
 - School Building Name and Address, including Zip Code
 - Kids Discover Online explicitly prohibits the collection of any other personally identifiable information for any Teacher or Principal that uses the service.
- Student data or teacher or principal data that is collected by Kids Discover Online and used to provide the services are protected in the following ways:
 - Access to any and all student data or teacher or principal data is limited to authorized Kids Discover personnel, and requires Company issued credentials that are updated every 3

months. The number of Kids Discover personnel with authorization is limited to individuals that have received proper training, and fully understand their roles and responsibilities.

- All authorized personnel have received training from IT professionals and senior executives at Kids Discover.
- Authorized personnel in charge of the development, management, maintenance, and overall support of critical systems, software, and hardware that stores such data are IT professionals with graduate degrees and extensive training in IT and Cybersecurity Operations.
- Student data or teacher or principal data that is collected by Kids Discover Online is stored in a cloud managed, enterprise grade Microsoft Azure SQL Server Database. The database utilizes the SHA1 hashing algorithm, with a hash sequence of 160 bits in length.
 - Data is automatically backed up every 24 hours.
 - Database capacity is 250GB, more than double the capacity needed to effectively store and run its contents.
 - Kids Discover Online utilizes three different development environments, including a local environment, staged environment, and production environment for both the database and general code base of the platform. This ensures that any testing, enhancements, bug fixes, data handling and/or data conversions are executed in two different test environments before being executed in a production environment (with live data).
 - Data that has been dormant for 12 months is automatically deleted from the database.
 - Data can be deleted within 24 to 48 hours by written request from any School, School District, Educational Agency, or Customer.
 - Data can be provided and delivered to any School, School District, Educational Agency, or Customer within 24 to 48 hours by written request.
- Kids Discover Online's database is virtually managed. Updates and upgrades are performed through Kids Discover's Microsoft Azure account, utilizing Microsoft Azure's market leading infrastructure and resources.

Systems Monitoring and Detection

- Kids Discover utilizes a suite of tools afforded by Microsoft Azure to monitor, detect, and in turn alert Kids Discover personnel of any anomalous activity.
 - Examples of anomalous activity may include, but are not limited to:
 - Traffic spikes from non-customer IP addresses
 - Service interruptions
 - Elevated levels of server errors
 - Brute force attacks
 - Microsoft-issued systems updates
 - Kids Discover personnel are alerted in real-time to anomalous activity based on predetermined thresholds and triggers. Depending on the nature of the anomalous activity and subsequent alert, Kids Discover personnel are clear in their roles and responsibilities in terms of response time and prioritization.

Response and Recovery

- Once an anomaly is detected, authorized Kids Discover personnel will conduct an investigation that includes, but is not limited to:
 - Review and analysis of server logs
 - Review and analysis of database contents
 - System performance tests and security audits
- Information is then shared to the appropriate Kids Discover personnel, including Kids Discover Management, to determine the depth and magnitude of any further investigations and potential data recovery procedures needing to be conducted.

- If it is determined that an incident such as a data breach has occurred, and that any data may have been effectively altered or compromised from the resulting incident, Kids Discover personnel will then notify any customers, Schools, or Educational Agencies as defined in this document of the nature of the incident, whose data may have been affected.
 - It is important to note that Kids Discover views all customers as partners and will work diligently to communicate transparently to all stakeholders of any issues or incidents that have arisen.
 - Kids Discover will continue to communicate with any customers, Schools, or Educational Agencies until the issue has been resolved and rectified, and both parties agree about the best possible path forward.
- Kids Discover will then work to restore, retrieve, correct, and improve any and all affected data, along with the systems, software, hardware, and general processes that resulted in the situation.
