To amend the third sentence of Article V. Section 3 (Data Security) to read: The Provider shall implement security practices that are in alignment with the NIST Cybersecurity Framework v1.1 or any update to this Framework that is adopted by the New York State Department of Education.

14. To replace Article V. Section 4 (Data Breach) to state: In the event of a Breach as defined in 8 NYCRR Part 121.1 Provider shall provide notification to LEA within seventy-two (72) hours of confirmation of the incident, unless notification within this time limit would disrupt investigation of the incident by law enforcement. In such an event, notification shall be made within a reasonable time after the incident. Provider shall follow the following process:

- (1) The security breach notification described above shall include, at a minimum, the following information to the extent known by the Provider and as it becomes available:
 - i. The name and contact information of the reporting LEA subject to this section.
 - ii. A list of the types of personal information that were or are reasonably believed to have been the subject of a breach.
 - iii. If the information is possible to determine at the time the notice is provided, then either (1) the date of the breach, (2) the estimated date of the breach, or (3) the date range within which the breach occurred. The notification shall also include the date of the notice.
 - iv. Whether the notification was delayed as a result of a law enforcement investigation, if that information is possible to determine at the time the notice is provided; and
 - v. A general description of the breach incident, if that information is possible to determine at the time the notice is provided; and
 - vi. The number of records affected, if known; and
 - vii. A description of the investigation undertaken so far; and
 - viii. The name of a point of contact for Provider.
- (2) Provider agrees to adhere to all federal and state requirements with respect to a data breach related to the Student Data, including, when appropriate or required, the required responsibilities and procedures for notification and mitigation of any such data breach.
- (3) Provider further acknowledges and agrees to have a written incident response plan that reflects best practices and is consistent with industry standards and federal and state law for responding to a data breach, breach of security, privacy incident or unauthorized acquisition or use of Student Data or any portion thereof, including personally identifiable information and agrees to provide LEA, upon request, with a summary of said written incident response plan.
- (4) LEA shall provide notice and facts surrounding the breach to the affected students, parents or guardians. Where a Breach of Student Data and/or APPR Data occurs that is attributable to Provider and/or its Subprocessors, Provider shall pay for or promptly reimburse LEA for the full cost of notification to Parents, Eligible Students, teachers, and/or principals.
- (5) In the event of a breach originating from LEA's use of the Service, Provider shall cooperate with LEA to the extent necessary to expeditiously secure Student Data.
- (6) Provider and its subprocessors will cooperate with the LEA, the NYSED Chief Privacy Officer and law enforcement where necessary, in any investigations into a Breach. Any costs incidental to the required cooperation or participation of the Provider will be the sole responsibility of the Provider if such Breach is attributable to Provider or its subprocessors.

15. To amend the definitions in Exhibit "C" as follows:

- "Subprocessor" is equivalent to subcontractor. It is a third party who the provider uses for data collection, analytics, storage, or other service to allow Provider to operate and/or improve its service, and who has access to Student Data.

Such term shall include an educational partnership organization that receives student and/or teacher or principal data from a school district to carry out its responsibilities and is not an educational agency and a not-for-profit corporation or other non-profit organization, other than an educational agency.

16. To add to Exhibit "C" the following definitions:

Lifetouch
Data Security and Privacy Plan

Shutterfly Lifetouch, LLC ("Lifetouch") is a trusted provider of school services, offering portrait and photography services to schools and families throughout North America since 1936. In preparation for Picture Day, Lifetouch requires certain roster information from your school ("School Data"). This data is used to produce and deliver portrait-based products and services needed for our schools' administrative purposes and/or for use in the school yearbook (the "School Service Items"), to deliver Picture Day notices on behalf of our schools, and to provide parents and guardians of students opportunities to purchase portraits. Lifetouch does not use School Data for any unauthorized purposes. As one of the original signatories of the Student Privacy Pledge, Lifetouch is committed to maintaining the privacy and security of student data and offering transparency to the schools and families that we serve. This plan describes some of the measures that Lifetouch takes to protect School Data in compliance with local, state, and federal privacy law.

Lifetouch complies with federal, state, and local data security and privacy requirements.

Lifetouch is aware of and committed to compliance with its legal obligations as a school service provider pursuant to state and federal data privacy laws, including the Family Educational Rights in Privacy Act (FERPA), New York Education Law § 2-d, and other similar laws. To perform the services we provide, Lifetouch has a legitimate need for certain School Data to provide photographic services and products for the school's administrative needs. Our schools retain the authority to control Lifetouch's use of School Data, including the right to require the return or destruction of any School Data provided to Lifetouch. Lifetouch will strive to meet any additional data handling requirements as prescribed by state or local law, or school district policies, provided we are notified of such policies before receiving the data. Lifetouch's Privacy Office and Legal Department continually monitor student data privacy laws across the country and work to ensure that Lifetouch remains compliant with these laws.

Lifetouch does not sell School Data nor use or disclose it for any purpose other than those authorized by our agreement with your school, including marketing or commercial purposes. We, likewise, require any vendors or sub-processors that we work with to agree to the same restrictions.

Lifetouch does not disclose any School Data to any other party except in compliance with applicable law, such as with the consent of the parent or guardian, to Lifetouch's authorized representatives to the extent they are carrying out the contract, or as required by statute or court order and with notice to the school.

Lifetouch uses a variety of safeguards to protect School Data.

Lifetouch has implemented a variety of physical, technical, and organizational security measures to help protect School Data from unauthorized access and use.

Facilities. Lifetouch data, including School Data, is maintained in cloud-based storage or in on-premises data centers. All facilities and systems are protected by physical security controls such as restricted role-based access, ID cards, entry logs and video monitoring. We have a secure backup process and utilize high availability systems and equipment to maintain availability.

Networks. Devices storing or providing access to School Data are protected with multi-layered security strategies. This includes network firewalls, host-based firewalls, and monitoring. We regularly test our networks by conducting network vulnerability scans. Client browser access to the Lifetouch Portal web servers utilizes SSL encryption for confidentiality and integrity of data transmitted over communication networks. Passwords are stored using a salted hash. Student images take advantage of AWS encryption including storage encryption with S3.

Personnel. Lifetouch's policy is to collect, use, and disclose personal information only in ways that are consistent with our respect for an individual's privacy. We require Lifetouch employees to sign confidentiality agreements as a condition of employment, and we provide training on the appropriate use and handling of School Data. Access to School Data is limited to those who need it to perform their jobs, and when our employees are instructed to only access School Data secure channels (like the Lifetouch Portal). We also take appropriate measures to enforce these policies.

Enterprise. A comprehensive set of IT policies based on ISO 27001/2, PCI-DSS, OWASP and/or NIST frameworks and standards, as applicable, governs information systems practices and procedures throughout the Lifetouch enterprise. Additionally, Lifetouch partners with secure payment processing platforms like PayPal to handle payment card data when the families we serve make their portrait purchases. We maintain a software development policy that includes, among other things, use of industry-recommended practices for secure authentication, logging, code review, server hardening, vulnerability scanning, security assessments, quality assurance procedures, change management, and patching.

That policy is one component of a comprehensive set of policies governing information systems practices and procedures throughout the Lifetouch enterprise, based on PCI-DSS, OWASP and/or NIST frameworks and standards as applicable. The Lifetouch Portal was designed in accordance with the Software & Information Industry Association's Best Practices for the Safeguarding of Student Information Privacy and Security for Providers of School Services.

Lifetouch sets strict security requirements for our third-party vendors.

While Lifetouch does not use third-party contractors to photograph students, Lifetouch does use several vendors to help provide our services (for example, service providers who assist us with data management).

When engaging a new third-party vendor, our information security team completes a brief assessment to determine whether the vendor will have access to any School Data. If so, the team completes an in-depth security questionnaire to evaluate the vendor's information security practices. Lifetouch vendors who have access to School Data are contractually required to implement effective security programs to protect data.

Lifetouch has robust privacy and security training programs for all employees who handle School Data.

Lifetouch has an internal team of dedicated privacy professionals, including the Lifetouch Privacy Office and the Lifetouch Information Security Office, who are responsible for ensuring that Lifetouch employees abide by all relevant laws when handling School Data. Lifetouch routinely holds trainings to educate our employees on privacy laws related to appropriate handling of School Data, as well as our own internal policies and procedures. Our employees complete a variety of in-person and on-demand training programs, including annual data privacy training, and have access to a digital library of

reference materials for any questions that may arise. Recordings of live training sessions are also made available for employees to access at any time if they would like additional refreshers.

Lifetouch has a comprehensive response plan for managing data security and privacy incidents and notifying our schools and regulators.

While Lifetouch uses a variety of measures to secure School Data, we know that no measures can guarantee that there will not be a data security incident. For that reason, Lifetouch maintains a Security Incident Response team to respond to any adverse events related to the security of the Lifetouch Portal and to notify affected parties in accordance with applicable law and contracts. Our Incident Response Team is comprised of information security and legal professionals, and we retain industry-leading forensics and law firms when needed to respond to an incident. We regularly test these incident response procedures through simulations and other annual exercises.
