- 6. Governing Law: Venue and Jurisdiction.** THIS DPA WILL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF THE LEA, WITHOUT REGARD TO CONFLICTS OF LAW PRINCIPLES. - 8. Authority.** Each party represents that it is authorized to bind to the terms of this DPA, including confidentiality and destruction of Student Data and any portion thereof contained therein, all related or associated institutions, individuals, employees or contractors who may have access to the Student Data and/or any portion thereof.

DESCRIPTION OF SERVICES

Trust-Ed Transit, LLC (Trust-Ed) is a *technology* company serving the education industry. The hosted (web-based) services provided by Trust-Ed (Services) are used to enable other third-party service organizations (Trust-Ed Affiliates) to provide student transportation services for school districts. Throughout this agreement, Trust-Ed is referred to as the Provider, and the Trust-Ed Affiliate is referred to as the LEA.

As the technology provider, Trust-Ed's responsibilities include initializing and uniquely configuring the system for each Affiliate. This initial configuration creates an Affiliate-specific, web-based portal into the Trust-Ed technology, representing a fully-functional and completely operational production environment for the Affiliate that can be accessed and utilized through most current generation internet browsers. To be operational, Trust-Ed's initial configuration must include the name, address, contact information, and logo(s) of the Affiliate, and will also necessarily include the name, title, and contact information for the Affiliate-designated Executive System Administrator. Trust-Ed will also provide training and support services for the Affiliate, including the detailed instructions needed for the Affiliate to populate the transportation services pricing, driver compensation details, and additional System Administrator(s)', school district(s)', school(s)', driver(s)', and passenger(s)' demographic and contact data into the system. It is primarily *this* information that is shared between the school district(s) and the Affiliate that constitutes the "*personally identifiable student information and other regulated data*" which is the subject of this Data Privacy Agreement (DPA).

The value of the Trust-Ed technology is in its ability to equip and enable the Affiliate to assist school districts resolve driver shortage challenges by pairing students (Passengers) with contracted educators and other school-district employees (Drivers) based on their relative Driver-Passenger geographic proximity of their home addresses or on other demographic factors considered important or relevant by the Affiliate, district(s), school(s), passenger(s), or guardian(s), for the daily transportation services by the Driver for the Passenger(s) to and from school. The technology also provides the Affiliate with an automated mechanism to calculate, record, organize, report, and electronically invoice school districts for the billable costs for these transportation services. The technology also provides the mechanisms for calculating, recording, organizing, and reporting of the Driver(s)' compensation for executing the student transportation services. This comprehensive technology provided and supported by Trust-Ed, operated by the Affiliate and potentially its client school districts, and executed by Drivers collectively serves to provide:

- the **Affiliate** with a new and potentially significant revenue stream and an extremely valuable new service offering for their client school districts,
- **school districts** with cost-effective, sustainable student transportation service options and workforce stability through the incremental income and job satisfaction earned by Drivers,
- **Drivers** with significant incremental income earned while commuting to work, and
- **guardians and students** with peace of mind and the opportunity for student(s)' academic growth through the benefits of cost-free, timely, and reliable transportation services to and from school.

While the responsibility of the *operational* sharing of sensitive data is primarily between the Affiliate and its client school district(s), Trust-Ed assumes responsibility for the ongoing security of network and system access to the technology being used to store, share, and utilize that data. Trust-Ed is committed to fully meeting these responsibilities through the leveraging of modern encryption technologies for all stored and shared data, and security standards for system access such as Multi-Factor Authentication (MFA). Trust-Ed's commitment to technological security extends beyond this DPA to include a comprehensive set of data security and privacy policies maintained and shared on its website, and extremely stringent data security policies maintained with two of its primary technology partners, Apple and Google, to ensure the living nature and on-going commitment to the maintenance of the specifications of those security and privacy policies.
