Neither failure nor delay on the part of any Party in exercising any right, power, or privilege hereunder shall operate as a waiver of such right, nor shall any single or partial exercise of any such right, power, or privilege preclude any further exercise thereof or the exercise of any other right, power, or privilege.

Severability.** Any provision of this DPA that is prohibited or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such prohibition or unenforceability without invalidating the remaining provisions of this DPA, and any such prohibition or unenforceability in any jurisdiction shall not invalidate or render unenforceable such provision in any other jurisdiction. Notwithstanding the foregoing, if such provision could be more narrowly drawn so as not to be prohibited or unenforceable in such jurisdiction while, at the same time, maintaining the intent of the Parties, it shall, as to such jurisdiction, be so narrowly drawn without invalidating the remaining provisions of this DPA or affecting the validity or enforceability of such provision in any other jurisdiction.
- 6. Governing Law; Venue and Jurisdiction.** THIS DPA WILL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF THE LEA, WITHOUT REGARD TO CONFLICTS OF LAW PRINCIPLES. EACH PARTY CONSENTS AND SUBMITS TO THE SOLE AND EXCLUSIVE JURISDICTION TO THE STATE AND FEDERAL COURTS FOR THE COUNTY OF THE LEA FOR ANY DISPUTE ARISING OUT OF OR RELATING TO THIS DPA OR THE TRANSACTIONS CONTEMPLATED HEREBY.

all or substantially all of the assets of such business. In the event that the Provider sells, merges, or otherwise disposes of its business to a successor during the term of this DPA, the Provider shall provide written notice to the LEA no later than sixty (60) days after the closing date of sale, merger, or disposal. Such notice shall include a written, signed assurance that the successor will assume the obligations of the DPA and any obligations with respect to Student Data within the Service Agreement. The LEA has the authority to terminate the DPA if it disapproves of the successor to whom the Provider is selling, merging, or otherwise disposing of its business.

8. **Authority.** Each party represents that it is authorized to bind to the terms of this DPA, including confidentiality and destruction of Student Data and any portion thereof contained therein, all related or associated institutions, individuals, employees or contractors who may have access to the Student Data and/or any portion thereof.

Provider warrants that its Data Security and Privacy Plan, at a minimum: (a) implements all applicable state, federal and local data privacy and security requirements; (b) has operational technical safeguards and controls in place to protect PII that it will receive under the service agreement; (c) complies with the LEA's parents bill of rights for data privacy and security; (d) requires training of all providers' employees, assignees and subprocessors who have Access to student data or APPR data; (e) ensures subprocessors are required to protect PII received under this service agreement; (f) specifies how data security and privacy incidents that implicate PII will be managed and ensuring prompt notification to the LEA, and (g) addresses Student Data return, deletion and destruction.
5. In addition to the requirements described in Paragraph 3 above, the Provider's Data Security and Privacy Plan shall be deemed to incorporate the LEA's Parents Bill of Rights for Data Security and Privacy, as found at the URL link identified in Exhibit J. The Subscribing LEA will provide its Parents Bill of Rights for Data Security and Privacy to the Provider upon execution of Exhibit "E".

6. All references in the DPA to “Student Data” shall be amended to include and state, “Student Data and APPR Data.”
7. To amend Article II, Section 5 to add: Provider shall ensure that its subprocessors agree that they do not have any property, licensing or ownership rights or claims to Student Data or APPR data and that they will comply with the LEA’s Data Privacy and Security Policy. Provider shall examine the data privacy and security measures of its Subprocessors. If at any point a Subprocessor fails to materially comply with the requirements of this DPA, Provider shall: (i) notify LEA, (ii) as applicable, remove such Subprocessor’s Access to Student Data and APPR Data; and (iii) as applicable, retrieve all Student Data and APPR Data received or stored by such Subprocessor and/or ensure that Student Data and APPR Data has been securely deleted or securely destroyed in accordance with this DPA. In the event there is an incident in which Student Data and APPR Data held, possessed, or stored by the Subprocessor is compromised, or unlawfully Accessed or disclosed, Provider shall follow the Data Breach reporting requirements set forth in the DPA.
8. In Article IV, Section 2, replace “otherwise authorized,” with “otherwise required” and delete “or stated in the Service Agreement.”
9. To amend Article IV, Section 3 to add: Provider shall ensure that all its employees and subprocessors who have Access to or will receive Student Data and APPR Data will be trained on the federal and state laws governing confidentiality of such Student Data and APPR Data prior to receipt. Access to or Disclosure of Student Data and APPR Data shall only be provided to Provider’s employees and subprocessors who need to know the Student Data and APPR Data to provide the services and such Access and/or Disclosure of Student Data and APPR Data shall be limited to the extent necessary to provide such services.
10. To replace Article IV, Section 6 (Disposition of Data) with the following: Upon written request from the LEA, Provider shall dispose of or provide a mechanism for the LEA to transfer Student Data obtained under the Service Agreement, within ninety (90) days of the date of said request and according to a schedule and procedure as the Parties may reasonably agree. Provider is prohibited from retaining disclosed Student Data or continuing to Access Student Data beyond the term of the Service Agreement unless such retention is expressly authorized for a prescribed period by the Service Agreement, necessary for purposes of facilitating the transfer of disclosed Student Data to the LEA, or expressly required by law. The confidentiality and data security obligations of Provider under this DPA shall survive any termination of this contract to which this DPA is attached but shall terminate upon Provider’s certifying that it and it’s subprocessors, as applicable: (a) no longer have the ability to Access any Student Data provided to Provider pursuant to the Service Agreement and/or (b) have destroyed all Student Data and APPR Data provided to Provider pursuant to this DPA. The Provider agrees that the timelines for disposition of data will be modified by any Assurance of Discontinuation, which will control in the case of a conflict.

Upon termination of this DPA, if no written request from the LEA is received, Provider shall dispose of all student data after providing the LEA with ninety (90) days prior notice.

The duty to dispose of student data shall not extend to Student Data that had been de-identified or placed in a separate student account pursuant to section II 3. The LEA may employ a **“Directive for Disposition of Data”** form, a copy of which is attached hereto as **Exhibit “D”**, or, with reasonable notice to the Provider, other form of its choosing. No further written request or notice is required on the part of either party prior to the disposition of Student Data described in **“Exhibit D”**.

11. To amend Article IV, Section 7 to add: ‘Notwithstanding the foregoing, Provider is prohibited from using Student Data or APPR data for any Commercial or Marketing Purpose as defined herein. And add after (iii) account holder, “which term shall not include students.”
12. To replace Article V, Section 1 (Data Storage) to state: Student Data and APPR Data shall be stored within the United States and Canada only. Upon request of the LEA, Provider will provide a list of the locations where Student Data is stored.
13. To replace Article V, Section 2 (Audits) to state: No more than once a year or following an unauthorized Access, upon receipt of a written request from the LEA with at least ten (10) business days’ notice and upon the execution of an appropriate confidentiality agreement, the Provider will allow the LEA or its designee(s) to audit the security and privacy measures that are in place to ensure protection of Student Data or any portion thereof as it pertains to the delivery of services to the LEA . The Provider will cooperate reasonably with the LEA or its designee(s) and any local, state, or federal agency with oversight authority or jurisdiction in connection with any audit or investigation of the Provider and/or delivery of Services to students and/or LEA, and shall provide reasonable Access to the Provider’s facilities, staff, agents and LEA’s Student Data and all records pertaining to the Provider, LEA and delivery of Services to the LEA.

Upon request by the New York State Education Department’s Chief Privacy Officer (NYSED CPO), Provider shall provide the NYSED CPO with copies of its policies and related procedures that pertain to the protection of information. In addition, the NYSED CPO may require Contractor to undergo an audit of its privacy and security safeguards, measures, and controls as they pertain to alignment with the requirements of New York State laws and regulations, and alignment with the NIST Cybersecurity Framework. Any audit required by the NYSED CPO must be performed by an independent third party at Provider’s expense and the audit report must be provided to the NYSED CPO. In lieu of being subject to a required audit, Provider may provide the NYSED CPO with an industry standard independent audit report of Provider’s privacy and security practices that was issued no more than twelve months before the date that the NYSED CPO informed Provider that it required Provider to undergo an audit. Failure to reasonably cooperate with any of the requirements in this provision shall be deemed a material breach of the DPA.

To amend the third sentence of Article V. Section 3 (Data Security) to read: The Provider shall implement security practices that are in alignment with the NIST Cybersecurity Framework v1.1 or any update to this Framework that is adopted by the New York State Department of Education.

14. To replace Article V. Section 4 (Data Breach) to state: In the event of a Breach as defined in 8 NYCRR Part 121.1 Provider shall provide notification to LEA within seventy-two (72) hours of confirmation of the incident, unless notification within this time limit would disrupt investigation of the incident by law enforcement. In such an event, notification shall be made within a reasonable time after the incident. Provider shall follow the following process:

(1) The security breach notification described above shall include, at a minimum, the following information to the extent known by the Provider and as it becomes available:

- i. The name and contact information of the reporting LEA subject to this section.
- ii. A list of the types of personal information that were or are reasonably believed to have been the subject of a breach.
- iii. If the information is possible to determine at the time the notice is provided, then either (1) the date of the breach, (2) the estimated date of the breach, or (3) the date range within which the breach occurred. The notification shall also include the date of the notice.
- iv. Whether the notification was delayed as a result of a law enforcement investigation, if that information is possible to determine at the time the notice is provided; and
- v. A general description of the breach incident, if that information is possible to determine at the time the notice is provided; and
- vi. The number of records affected, if known; and
- vii. A description of the investigation undertaken so far; and
- viii. The name of a point of contact for Provider.

(2) Provider agrees to adhere to all federal and state requirements with respect to a data breach related to the Student Data, including, when appropriate or required, the required responsibilities and procedures for notification and mitigation of any such data breach.

(3) Provider further acknowledges and agrees to have a written incident response plan that reflects best practices and is consistent with industry standards and federal and state law for responding to a data breach, breach of security, privacy incident or unauthorized acquisition or use of Student Data or any portion thereof, including personally identifiable information and agrees to provide LEA, upon request, with a summary of said written incident response plan.

(4) LEA shall provide notice and facts surrounding the breach to the affected students, parents or guardians. Where a Breach of Student Data and/or APPR Data occurs that is attributable to Provider and/or its Subprocessors, Provider shall pay for or promptly reimburse LEA for the full cost of notification to Parents, Eligible Students, teachers, and/or principals.

(5) In the event of a breach originating from LEA's use of the Service, Provider shall cooperate with LEA to the extent necessary to expeditiously secure Student Data.

(6) Provider and its subprocessors will cooperate with the LEA, the NYSED Chief Privacy Officer and law enforcement where necessary, in any investigations into a Breach. Any costs incidental to the required cooperation or participation of the Provider will be the sole responsibility of the Provider if such Breach is attributable to Provider or its subprocessors.

15. To amend the definitions in Exhibit "C" as follows:

- "Subprocessor" is equivalent to subcontractor. It is a third party who the provider uses for data collection, analytics, storage, or other service to allow Provider to operate and/or improve its service, and who has access to Student Data.

- “Provider” is also known as third party contractor. It any person or entity, other than an educational agency, that receives student data or teacher or principal data from an educational agency pursuant to a contract or other written agreement for purposes of providing services to such educational agency, including but not limited to data management or storage services, conducting studies for or on behalf of such educational agency, or audit or evaluation of publicly funded programs. Such term shall include an educational partnership organization that receives student and/or teacher or principal data from a school district to carry out its responsibilities and is not an educational agency and a not-for-profit corporation or other non-profit organization, other than an educational agency.

16. To add to Exhibit “C” the following definitions:

- **Access:** The ability to view or otherwise obtain, but not copy or save, Student Data and/or APPR Data arising from the on-site use of an information system or from a personal meeting.

- **Disclose or Disclosure:** The intentional or unintentional communication, release, or transfer of Student Data and/or APPR Data by any means, including oral, written, or electronic.
- **Encrypt or Encryption:** As defined in the Health Insurance Portability and Accountability Act of 1996 Security Rule at 45 CFR § 164.304, encrypt means the use of an algorithmic process to transform Personally Identifiable Information into an unusable, unreadable, or indecipherable form in which there is a low probability of assigning meaning without use of a confidential process or key.
- **Release:** Shall have the same meaning as Disclose
- **LEA:** As used in this DPA and all Exhibits, the term LEA shall mean the educational agency, as defined in Education Law Section 2-d, that has executed the DPA; if the LEA is a board of cooperative educational services, then the term LEA shall also include Participating School Districts for purposes of the following provisions of the DPA: Article I, Section 2; Article II, Sections 1 and 3; and Sections 1, 2, and 3 of Article III.

Essential Education Security [2024]

This document outlines the scope of customer data stored within the Essential Education system and details the security measures in place to protect that data. It provides customers with the necessary information to evaluate Essential Education from a security standpoint. Additionally, Essential Education is open to implementing security controls beyond those mentioned here if needed to meet specific customer policies. For any additional security requirements, please reach out to your sales representative for further discussion.

A. Scope & Exposure

A.1. Customer data accessible to Essential Education

Essential Education is a stand-alone web-based educational tool that does not require access to any customer systems or databases. No software needs to be downloaded, installed, or run by users outside of a standard web browser. The Essential Education system contains extremely limited personal data about users.

For student users, Essential Education requires only a first name, last name, a username or email address, and a password. The username and password do not need to correspond to credentials in the customer's system (they can be unique to the Essential Education system). During use of the application, student users are prompted to provide an email address, but this feature can be disabled on request. A student's associated primary teacher may also be required, but this feature can be disabled on request.

For educator users, Essential Education requires only a first name, last name, email address, and a password. The username and password do not need to correspond to credentials in the customer's system (they can be unique to the Essential Education system).

Educator users may optionally enter a limited amount of additional personal data about students, including:

- Phone number
- Test scores
- Users' associated classes
- Parent/Guardian email
- Birthdate

Educator users also provide the following required meta information about user accounts to configure use of the Essential Education system:

- The Essential Education District the user is associated with.
- The Essential Education School the user is associated with.
- A list of Essential Education products, courses, subjects, and content assigned to the user.
- Whether Essential Education practice test time limits should be disabled for the user.
- Whether the Essential Education account is active or inactive.

During use of the application, users may enter the following information into Essential Education:

- Answers to educational content (practice tests, quizzes, lessons, activities, etc.)
- Grading feedback for essays

- Inter-user messages and message file attachments

During use of the application, Essential Education generates and stores the following information about users:

- Scores earned by users on all EE-provided content (practice tests, quizzes, lessons, initial assessments, essays, etc.)
- Time spent by users on all EE-provided content (practice tests, quizzes, lessons, initial assessments, essays, etc.)
- Starting and completion time of all EE-provided content (practice tests, quizzes, lessons, initial assessments, essays, etc.)
- Viewing time/state of certain videos, announcements, and other content within the application
- Language used to take content for EE-provided content that is available in multiple languages
- Personalized lesson plans containing EE-provided content for users
- Personalized recommendations for learning resources and content for users
- Progress of users through EE-provided content
- Predictions of user mastery of various skills, educational standards, and standardized tests

During use of the application, Essential Education may collect standard metadata for all requests sent to Essential Education servers (date/time, IP address, browser, operating system, originating location, requested resource, referrer, load time, etc.) for auditing, support, and engineering purposes.

Essential Education stores data in Amazon Web Services, in the us-west-2 region.

A.2. Third party data processors

Essential Education relies on a number of third parties to store or process customer data. The following table documents third parties with access to any Essential Education customer data. Technical Documentation

B. Technical Documentation

B.1. High-Availability Design

Essential Education provides availability within a single Amazon Web Services region. Essential Education provides redundancy across two availability zones (A and B) in the us-west-2 (Oregon) region. The following diagram illustrates the design of the architecture.

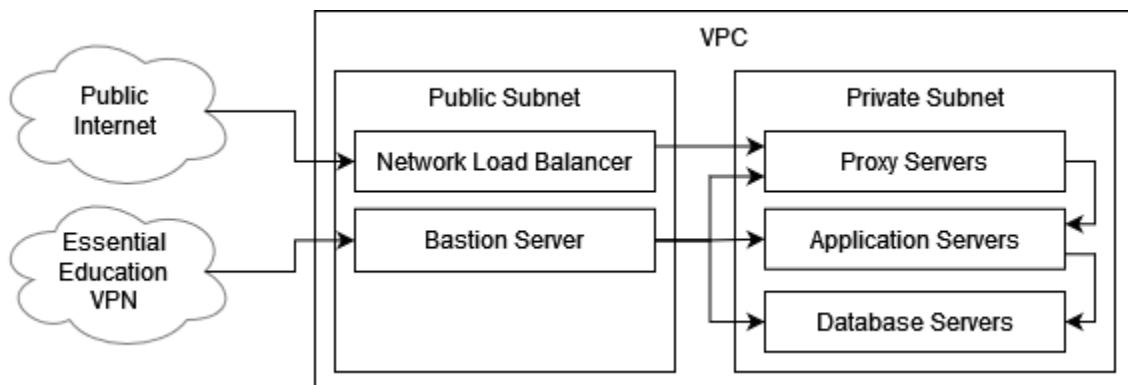

Incoming traffic can route to an AWS Network Load Balancer through either the us-west-2a or us-west-2b availability zones. Each region has an independent IP address. The Network Load Balancer routes traffic to one of multiple redundant caching reverse proxy servers. The caching reverse proxy servers route requests to application servers spread across both the us-west-2a and us-west-2b availability zones. The primary database server runs one primary instance and one replica instance. In the event of a failure of the primary instance, the database will automatically failover to the replica instance within a matter of minutes.

Note: this diagram is intended to represent the architectural design of the infrastructure, but is not meant to convey the specific count of servers or their distribution across specific availability zones, as these attributes may vary.

B.2. Security Design

Essential Education uses a VPC with separate subnets for public and private services. Services in the private subnet are only accessible through a bastion server. AWS resources are protected by restrictive security groups. The following diagram represents this configuration.

Access to the bastion server is restricted by IP to the Essential Education VPN by AWS security groups. Essential Education requires the use of SSH keypair authentication for all users accessing the Bastion server. Essential Education requires 2FA for access to the VPN.

Encryption (HTTPS) is available for connections between the public internet and the network load balancer.

Most traffic between Essential Education servers is not encrypted in transit.

Data stored in the MySQL databases is encrypted at rest using AWS RDS encryption. Most server volumes and secondary storages (cache database, queues, server volumes) are not encrypted at rest.

B.3. Logging and Auditing Data

The following table shows data logged by Essential Education.

Data	Typical Retention	Reviewable in App
User logins and failures	Indefinitely	No
User account creation	6 months	No
User account edits	6 months	No
User account status changes	Indefinitely	Yes
Course data reset operations	Indefinitely	Yes
Essay grading operations	Indefinitely	No
HTTP access logs	7 days	No

Essential Education can assist with review of log data for pieces of data not reviewable in the application.

B.4. Vulnerability Monitoring & Mitigation

Essential Education uses the [Tenable](#) Vulnerability Management tool to scan for and track vulnerabilities in its production infrastructure. A vulnerability scan is run at least weekly. Tenable assigns a Vulnerability Priority Rating (VPR) to each vulnerability to assess its potential impact. Essential Education uses the VPR as a starting point for determining its response to each issue, but after evaluation of the issue may determine the vulnerability is a higher or lower priority than the initial VPR indicates based on factors specific to the Essential Education infrastructure.

Priority	Response
Critical (VPR 9.0+)	Essential Education will evaluate the vulnerability within 72 hours of the scan running. If necessary, a patch will be applied after evaluation as soon as it is available. If the vulnerability

	does not pose an immediate risk to data, the patch will be applied as soon as possible without disrupting operation of the platform.
High (VPR 7.0+)	Essential Education will evaluate the vulnerability within a week of identification. If the vulnerability does not pose an immediate risk to data, Essential Education targets application of the patch within 14 days.
Medium (VPR 4.0+)	Essential Education will evaluate the vulnerability within 14 days of identification. Whether and when to address each Medium priority issue will be determined on a case-by-case basis.
Low	Essential Education will evaluate the vulnerability within a month of identification. Whether and when to address each Low priority issue will be determined on a case-by-case basis.

Essential Education uses the Tenable Web App Scanning tool to scan its application for known and unknown vulnerabilities at least monthly. Vulnerabilities found by this tool are addressed according to the same process described above.

B.5 Domains

The Essential Education application uses the following domain names. Domains are divided into the following classes:

- A. Required for core functionality of one or more products (see notes for details).
- B. Can be blocked (but not disabled within Essential Education), but allowing these domains is recommended for complete functionality. Blocking these domains may degrade the functionality or performance of the application.
- C. Can be disabled, but doing so may degrade the functionality or performance of the application. Note that blocking these domains without also disabling them in the Essential Education application may cause functionality to break.
- D. Can be disabled in Essential Education and/or blocked without significant impact to the functionality of the application. Disabling these in Essential Education is recommended if they are blocked.

Class	Domain	Notes
-------	--------	-------

A	app.essentialed.com	The main Essential Education application. This domain is required for all products.
B	www.essentialed.com	Essential Education help center, website, and default login page. Blocking this domain will block the help center and default login page, however an alternative login page is also available on the app.essentialed.com domain.
B	essentialed.com	Redirects to www.essentialed.com.
B	passged.com	First-party domain used to host some assets used throughout the application. Can be blocked without significant impact to the application.
A	dreamcatcher.essentialed.com	Required for the Dream Catcher product, but not used otherwise.
A	d2pfk5on3dtp5q.cloudfront.net	Required CDN for the Dream Catcher product, but not used otherwise.
C	d2lpurk2qe2oc.cloudfront.net	Primary application CDN. Can be disabled via a configuration option in Essential Education. Performance may be reduced when disabled.
D	use.typekit.net	Font CDN. Can be disabled via a configuration option in Essential Education. The application will render with fall-back fonts when disabled or blocked.
C	wistia.com	Video CDN. Can be disabled via a configuration option in Essential Education. The application will render with a fall-back video

		<p>player when disabled. Video playback performance may be reduced when disabled.</p>

D	js-na1.hs-scripts.com	<p>Used for analytics around educator training resources and to process training webinar sign-ups.</p> <p>Can be disabled via a configuration option in Essential Education. Educators may be unable to sign up for webinars when disabled or blocked.</p>
D	google-analytics.com	<p>Used for analytics on a limited number of pages.</p> <p>Can be disabled via a configuration option in Essential Education. Can be blocked or disabled without significant impact to the application.</p>
D	js-agent.newrelic.com	<p>Used for technical analytics to monitor the performance and stability of the application.</p> <p>Can be disabled via a configuration option in Essential Education. Can be blocked or disabled without significant impact to the application.</p>
D	bam.nr-data.net	<p>Same notes as js-agent.newrelic.com.</p>

B.6 Data Backup

Daily backups of the database are created via the Amazon Web Services snapshot feature and retained for approximately 1 month. Additionally, a monthly backup is retained for at least 1 year. Backups can be restored using the Amazon Web Services snapshot feature for disaster-recovery or data review purposes. Essential Education does not provide selective restoration from backup of customer-deleted data. Essential Education

does not provide selective removal of customer information from backups.

B.7 Single Sign On

Essential Education provides its own user management and authentication system, but also supports single sign-on integration using SAML version 2 or LTI. Active Directory integration is not supported at this time.

B.8 Roles and Permissions

Essential Education provides a number of account types (district admin, school admin, teacher, student) that provide different levels of access to the system. Essential Education can also customize the capabilities of these roles for individual customers to an extent.

Role	Intended Purpose / Access
District Admin	For customers with multiple locations / facilities, the district admin has access to all data in all of the customer's locations.
School Admin	School admins have access to all data within a single location / facility, including the ability to manage teachers.
Teacher	Teachers have access to most data within a single location / facility, but not the ability to manage other teachers.
Student	Students only have access to their own data.

B.9 Multi-Factor Authentication

MFA is not yet supported for customer use, however Essential Education staff are required to authenticate with MFA on a VPN to access the administrative control features of the application.

B.10 Account Deactivation / Expiration

A system for automatically deactivating inactive student accounts is available and enabled by default, although at this time the feature does not apply to staff accounts.

The application is not designed to automatically log off, lock, or terminate sessions for inactivity, however sessions do expire after approximately 7 days of inactivity. Study time will stop being recorded after 8 minutes of inactivity.

B.11 Password Handling

For educator accounts, the password must be at least 10 characters long and include characters from at least two of: uppercase, lowercase, numbers, or symbols.

For student accounts, the password must be at least 6 characters long, but does not include additional complexity constraints.

Passwords do not expire.

Passwords are hashed using **bcrypt** for storage.

C. Business Documentation

C.1. Disaster Recovery Plan

Essential Education provides redundancy across two availability zones (A and B) in the us-west-2 (Oregon) region. The following table summarizes the Disaster recovery targets and procedures for various failure scenarios. At this time Essential Education does not have detailed documentation or perform testing on these plans.

Failure	Target Recovery	Summary of Process
Failure of services within a single AZ	Within 4 hours	Affected services are moved to a different AZ
Failure of services within an entire region	Within 48 hours	Application hosting is moved to us-east-1
Failure of CloudFront	Within 4 hours	CloudFront is disabled at the application level and assets previously served by CloudFront are served directly by the application servers.
Failure of EFS	Within 12 hours	Static content served by EFS will be reconfigured to be served by the application server.

		Message attachments and content editing will be disabled until EFS is restored by AWS.
Failure of S3	Within 8 hours	Assets served by S3 will be reconfigured to be served by the application server.

Essential Education has hosted infrastructure on Amazon Web Services since 2015 and has never needed to perform disaster recovery.

Issue Escalation Path

Clients can escalate an issue to Essential Education via phone or email:

- Phone: (800) 931-8069 x 4
- Email: support@essentialed.com

Communication Plan

Essential Education will communicate disaster recovery information via either the essentialed.com website or announcements within the Essential Education application LMS.

C.3. Change Control

Essential Education operates a standard Agile development process with weekly sprints. Essential Education uses various software tools, including JIRA and Git, to track change requests and changes to the application.

Changes go through the following process:

1. Initial requirements for the change are defined by the primary stakeholder.
2. The initial requirements are evaluated and refined by interested parties, including various business units of Essential Education, the software development team, and customers.
3. The change is prioritized by the product planning and software development teams.
4. The change is implemented by the development team.

5. The change is reviewed by the development team.
6. The change is tested for correct behavior by the QA team.
7. The change is tested for correct behavior by the stakeholder and other interested parties.
8. The change is tested for regressions by the QA team.
9. The change is deployed as part of a release.

C.4. Firewall Policies

Essential Education allows public access to its network load balancer and web applications over ports 80 and 443, with certain restrictions:

- Certain administrative functions within the application are restricted by the application software to the Essential Education VPN. Changes to these restrictions must be approved by the VP of Software Development.
- Certain geographic regions of the world are restricted. Changes to these restrictions may be implemented at the request of the Customer Service team.

Essential Education allows access to its bastion server only from the Essential Education VPN. Changes to these restrictions must be approved by the VP of Software Development.
