Notwithstanding the foregoing, if such provision could be more narrowly drawn so as not to be prohibited or unenforceable in such jurisdiction while, at the same time, maintaining the intent of the Parties, it shall, as to such jurisdiction, be so narrowly drawn without invalidating the remaining provisions of this DPA or affecting the validity or enforceability of such provision in any other jurisdiction.
6. **Governing Law; Venue and Jurisdiction.** THIS DPA WILL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF THE LEA, WITHOUT REGARD TO CONFLICTS OF LAW PRINCIPLES. EACH PARTY CONSENTS AND SUBMITS TO THE SOLE AND EXCLUSIVE JURISDICTION TO THE STATE AND FEDERAL COURTS FOR THE COUNTY OF THE LEA FOR ANY DISPUTE ARISING OUT OF OR RELATING TO THIS DPA OR THE TRANSACTIONS CONTEMPLATED HEREBY.

Such notice shall include a written, signed assurance that the successor will assume the obligations of the DPA and any obligations with respect to Student Data within the Service Agreement. The LEA has the authority to terminate the DPA if it disapproves of the successor to whom the Provider is selling, merging, or otherwise disposing of its business.
8. **Authority.** Each party represents that it is authorized to bind to the terms of this DPA, including confidentiality and destruction of Student Data and any portion thereof contained therein, all related or associated institutions, individuals, employees or contractors who may have access to the Student Data and/or any portion thereof.

The Provider agrees that the timelines for disposition of data will be modified by any Assurance of Discontinuation, which will control in the case of a conflict. Upon termination of this DPA, if no written request from the LEA is received, Provider shall dispose of all student data after providing the LEA with ninety (90) days prior notice.

The duty to dispose of student data shall not extend to Student Data that had been de-identified or placed in a separate student account pursuant to section II 3. The LEA may employ a **“Directive for Disposition of Data”** form, a copy of which is attached hereto as **Exhibit “D”**, or, with reasonable notice to the Provider, other form of its choosing. No further written request or notice is required on the part of either party prior to the disposition of Student Data described in **“Exhibit D”**.

13. To replace Article V, Section 2 (Audits) to state: No more than once a year or following an unauthorized Access, upon receipt of a written request from the LEA with at least ten (10) business days’ notice and upon the execution of an appropriate confidentiality agreement, the Provider will allow the LEA or its designee(s) to audit the security and privacy measures that are in place to ensure protection of Student Data or any portion thereof as it pertains to the delivery of services to the LEA. The Provider will cooperate reasonably with the LEA or its designee(s) and any local, state, or federal agency with oversight authority or jurisdiction in connection with any audit or investigation of the Provider and/or delivery of Services to students and/or LEA, and shall provide reasonable Access to the Provider’s facilities, staff, agents and LEA’s Student Data and all records pertaining to the Provider, LEA and delivery of Services to the LEA.

Upon request by the New York State Education Department’s Chief Privacy Officer (NYSED CPO), Provider shall provide the NYSED CPO with copies of its policies and related procedures that pertain to the protection of information. In addition, the NYSED CPO may require Contractor to undergo an audit of its privacy and security safeguards, measures, and controls as they pertain to alignment with the requirements of New York State laws and regulations, and alignment with the NIST Cybersecurity Framework. Any audit required by the NYSED CPO must be performed by an independent third party at Provider’s expense and the audit report must be provided to the NYSED CPO. In lieu of being subject to a required audit, Provider may provide the NYSED CPO with an industry standard independent audit report of Provider’s privacy and security practices that was issued no more than twelve months before the date that the NYSED CPO informed Provider that it required Provider to undergo an audit. Failure to reasonably cooperate with any of the requirements in this provision shall be deemed a material breach of the DPA.

To amend the third sentence of Article V. Section 3 (Data Security) to read: The Provider shall implement security practices that are in alignment with the NIST Cybersecurity Framework v1.1 or any update to this Framework that is adopted by the New York State Department of Education.

14. To replace Article V. Section 4 (Data Breach) to state: In the event of a Breach as defined in 8 NYCRR Part 121.1 Provider shall provide notification to LEA within seventy-two (72) hours of confirmation of the

incident, unless notification within this time limit would disrupt investigation of the incident by law enforcement. In such an event, notification shall be made within a reasonable time after the incident.

Provider shall follow the following process:

- (1) The security breach notification described above shall include, at a minimum, the following information to the extent known by the Provider and as it becomes available:

  - iv. Whether the notification was delayed as a result of a law enforcement investigation, if that information is possible to determine at the time the notice is provided; and
  - v. A general description of the breach incident, if that information is possible to determine at the time the notice is provided; and
  - vi. The number of records affected, if known; and
  - vii. A description of the investigation undertaken so far; and
  - viii. The name of a point of contact for Provider.
- (2) Provider agrees to adhere to all federal and state requirements with respect to a data breach related to the Student Data, including, when appropriate or required, the required responsibilities and procedures for notification and mitigation of any such data breach.

- (4) LEA shall provide notice and facts surrounding the breach to the affected students, parents or guardians. Where a Breach of Student Data and/or APPR Data occurs that is attributable to Provider and/or its Subprocessors, Provider shall pay for or promptly reimburse LEA for the full cost of notification to Parents, Eligible Students, teachers, and/or principals.
- (5) In the event of a breach originating from LEA's use of the Service, Provider shall cooperate with LEA to the extent necessary to expeditiously secure Student Data.
- (6) Provider and its subprocessors will cooperate with the LEA, the NYSED Chief Privacy Officer and law enforcement where necessary, in any investigations into a Breach. Any costs incidental to the required cooperation or participation of the Provider will be the sole responsibility of the Provider if such Breach is attributable to Provider or its subprocessors.

## DATA CENTER SECURITY & INFORMATION LIFECYCLE MANAGEMENT

### Data Center and Data Location

Your data will be hosted in **Amazon Web Services (AWS)** within their data centers located in the **United States**. AWS does not permit non-employees access to their data center facilities. Logical access is restricted using industry best practices for hosting applications with Public Cloud Service providers. AWS Physical security controls include but are not limited to perimeter controls such as fencing, walls, security staff, video surveillance, intrusion detection systems and other electronic means. The AWS SOC reports provide additional details on the specific control activities executed by AWS. Refer to ISO 27001 standards; Annex A, domain 11 for further information. AWS has been validated and certified by an independent auditor to confirm alignment with ISO 27001 certification standard. AWS Authorized staff must pass two-factor authentication a minimum of two times to access data center floors. Physical access points to server locations are recorded by closed circuit television cameras (CCTV) as defined in the AWS Data Center Physical Security Policy."

### Data Encryption

As tenants of Amazon Web Services, we naturally adopt the usage of Amazon's proprietary overlay protocol utilized when systems in our environment need to communicate with each other via public networks. Data sent over public networks is encrypted using an implementation recommended by the National Institute of Standards and Technology (NIST). Similarly, NIST leading practices for encrypting data at rest and in motion are implemented. Data is encrypted at rest and in motion

### Data Access

Access to your school or district's data requires a valid user account, username, and password. An authorized user with the appropriate user permissions can create user accounts. All users are required to initiate a valid session, which expires after 60 minutes of inactivity. All sign-ins by users authorized to view school data are logged with a timestamp, account ID, and IP address. Any pages that require a user to enter their account information are encrypted using SSL. All passwords are stored in the database in an encrypted format created with a one-way hash.

### Data Backups

Client data is backed up nightly both locally and remotely.

## APPLICATION & INTERFACE SECURITY

## **Vulnerability Scanning**

TeachTown utilizes an enterprise grade vulnerability scanning capability to scan our systems on a regular cadence and update systems in accordance with internally established standards..

## **Data Integrity**

We have implemented several mechanisms to verify data integrity including but not limited to the following: logic to maintain data synchronization between data stores, implementation of transport layer security (TLS) with the appropriate cipher suites enabling for integrity. Additionally, we regularly test data integrity via automated restoration of data to our reporting environment.

# **BUSINESS CONTINUITY & OPERATIONAL RESILIENCE**

## **BCDR**

Our Business Continuity Policies and Plans have been developed in alignment with Control Objectives for Information and Related Technologies (COBIT) guidance. We have planned tests on our systems.

## **Retention Policy**

We backup data in alignment with contractual, and applicable regulatory and statutory requirements. We test our database backups nightly by performing full restorations to our reporting environments.

# **DATA SECURITY & INFORMATION LIFECYCLE MANAGEMENT**

## **eCommerce Transactions**

TeachTown uses industry standard TLS 1.2 AES-256 for all client-server interactions. As tenants of Amazon Web Services, we naturally adopt the usage of Amazon's proprietary overlay protocol utilized when systems in our environment need to communicate with each other via public networks. Data sent over these networks is encrypted.

## **Non Production Data**

We utilize virtual desktop interfaces to securely access data in our environments. As such, no data leaves our cloud environment. Additionally, our non-production environment utilizes the same controls as noted above.

## **Secure Disposal**

We have a documented procedure outlining the steps taken to sanitize all computing resources of tenant personally identifiable information when provided with a request from an individual or entity to do so. As tenants of Amazon Web Services, we rely upon the industry recognized

techniques (NIST 800-88) for decommissioning storage nodes that provide a level of assurance that customer data is not exposed to unauthorized individuals.

### **Asset Management**

In alignment with NIST Cybersecurity Framework (CSF), TeachTown assets are assigned owners and are tracked and monitored.

### **SOC2 Type 2 Certification**

TeachTown is SOC II TYPE II certified and operates its controls to provide assurance of ongoing SOC II Type II obligations.

## **Data Privacy**

### **Privacy Oversight and Laws**

TeachTown maintains a comprehensive privacy program to address the data we collect, use and disclose as a result of the operation of our online solution. We consider personal information, including student data, to be confidential and do not use student data for any purpose other than to provide the service on our client's behalf, in accordance with any contractual agreements with our clients. Our collection, use disclosure of student data is in accordance with our Terms of Service and/or any other agreement with a client, and by the provisions of the Family Educational Rights and Privacy Act ("FERPA"), the Protection of Pupil Rights Amendment ("PPRA"), the Children's Online Privacy Protection Act ("COPPA"), and applicable state laws which relate to the collection, use and disclosure of student data. We collect, maintain, use and share student data only for an authorized educational purpose and as described in our agreement with our client, or as directed by our clients. For more information on how we collect, process, store and share data, please refer to our published [privacy notice](#).

### **Data Policies**

We have a documented Data Privacy Notice on our website as noted above. In addition, Teachtown has a documented internal Global Privacy Policy.

### **Training/Awareness**

We provide privacy training and awareness to all employees annually with refreshers throughout the year. Training is also conducted upon hire.

### **Controls & Reporting**

TeachTown further has reporting controls in place to allow employees, contractors, service providers or clients to report unauthorized use or disclosure of data, as well as concerns with how TeachTown administers its privacy responsibilities.

## **GOVERNANCE & RISK MANAGEMENT**

## **Baseline Requirements**

We utilize established baseline secure configuration standards for infrastructure that is our responsibility as per the shared responsibility model.

## **Policy, Policy Enforcement & Review**

TeachTown implements formal, documented policies and procedures that provide guidance for operations and information security within the organization. The policies address purpose, scope, ownership, roles and responsibilities. Employees who violate TeachTown standards and/or protocols are investigated and appropriate disciplinary action (e.g. warning, performance plan, suspension, and/or termination) is followed. TeachTown information security and/or privacy policies are reviewed and approved on an annual basis at a minimum by leadership.

## **HUMAN RESOURCES**

### **Asset Returns and Termination**

Upon termination, we execute our offboarding procedures, which include steps for access removal and collection of assets.

### **Background Screening & Employee Agreements**

We conduct criminal background checks, as permitted by applicable law, for employees who perform onsite training and coaching and/or are in the classroom interacting with teachers or students, as well as employees who have access to student data.

### **Training/Awareness**

We provide cybersecurity and privacy training and awareness to all employees annually with refreshers throughout the year. Training is also conducted upon hire. Our cybersecurity training and awareness program is built in alignment with the NIST CSF framework and incorporates privacy rules and regulations.

## **IDENTITY & ACCESS MANAGEMENT**

### **Audit Tool Access**

We restrict, log, and monitor access to our information security systems. We utilize a Managed Security Service Provider (MSSP) Security Operations Center (SOC) to monitor logs from these systems. Additionally, we conduct periodic access reviews and take the appropriate action to revoke or reduce privileges, where necessary. We have identified auditable event/log categories across systems in our environment. As such, the system owners have configured these systems to record continuously the security-related events in accordance with requirements. These logs are monitored by our Managed Security Service Provider (MSSP) Security Operations Center (SOC) and anomalous activity is alerted appropriately for review

and analysis.

### **User Access Policy & Procedures**

As per our offboarding standard operating procedure, access that is no longer required is revoked accordingly. Periodically, we audit this standard operating procedure to assess the procedures operating effectiveness. We utilize a centralized directory service and an identity and access management (IAM) capability to manage and store the identity of all personnel who have access to the IT infrastructure.

### **Source Code Access & Restriction**

We utilize logical access controls to prevent unauthorized access to the application and/or source code. Examples of these logical access controls include: a Web Application Firewall (WAF) and AWS Identity and Access Management (IAM) policies configured in alignment with least privilege principles. We utilize role based access controls (RBAC) to prevent unauthorized access.

### **User Access**

We utilize our change management procedures as the mechanism to document and approve access requests. Approved granted access is governed by logical access control policies configured in alignment with least privilege principles through the usage of AWS Identity and Access Management (IAM). We conduct periodic access reviews for administrators who have access to sensitive data. If excess privileges are found, they are revoked. As per our offboarding standard operating procedure, access that is no longer required is revoked accordingly. Periodically, we audit this standard operating procedure to assess the procedures operating effectiveness.

## **INFRASTRUCTURE & VIRTUALIZATION SECURITY**

### **Audit Logging & Intrusion Detection**

We utilize an enterprise grade anti-malware/anti-virus, endpoint detection, and response (EDR) capability for systems in our environment. This capability naturally provides detections needed to respond to possible incidents. In accordance with least privilege principles, access to audit logs are restricted to authorized personnel. We have identified auditable event/log categories across systems in our environment. As such, the system owners have configured these systems to record continuously the security-related events in accordance with requirements. These logs are monitored by our Managed Security Service Provider (MSSP) Security Operations Center (SOC) and anomalous activity is alerted appropriately for review and analysis.

### **OS Hardening & Base Controls**

We utilize several mandatory technical controls for workstations in our environment. Some examples include: host based firewall with strict port/protocols limitations,

anti-virus/anti-malware, endpoint detection and response (EDR), and patch management. Similarly, we utilize the same mandatory technical controls within our server environment, with some notable additions including: hardened images in alignment with industry recognized authoritative sources on configuration management, network based firewall, and vulnerability scanning. We utilize a Web Application Firewall (WAF) and network based firewall to protect systems from unauthorized access.

### **AWS Security**

As tenants of Amazon Web Services, we rely on our cloud providers' controls in regards to privilege access for administrative consoles. AWS states the following: "AWS employs the concept of least privilege, allowing only the necessary access for users to accomplish their job function. When user accounts are created, user accounts are created to have minimal access. Access above these least privileges requires appropriate authorization. Refer to AWS SOC reports for more information on Access Controls"

### **Wireless Security**

As tenants of Amazon Web Services, we rely on our cloud providers' controls in regards to the protection of the AWS wireless network environment. AWS states the following: "There are no wireless networks or radio signals within the system boundary. AWS continuously monitors wireless networks in order to detect rogue or other devices not authorized to authenticate to the system. AWS continuously monitors wireless networks in order to detect rogue or other devices not authorized to authenticate to the system."

## **SECURITY INCIDENT MANAGEMENT, E-DISCOVERY & CLOUD FORENSICS**

### **Incident Management**

Our incident response plan has been developed in alignment with several incident response related control objectives articulated in the NIST CSF framework alongside NIST Special Publication (SP) 800-61 (Computer Security Incident Handling Guide).

### **Incident Reporting**

Employees are provided training on how to recognize suspected security incidents and where to report them. We utilize predefined and an exclusive communication channel to enable our employees to report any potential incidents. For relationships we have with external entities, they are informed of their responsibility to report information security events contractually.
