Provider is prohibited from retaining disclosed Student Data or continuing to Access Student Data beyond the term of the Service Agreement unless such retention is expressly authorized for a prescribed period by the Service Agreement, necessary for purposes of facilitating the transfer of disclosed Student Data to the LEA, or expressly required by law. The confidentiality and data security obligations of Provider under this DPA shall survive any termination of this contract to which this DPA is attached but shall terminate upon Provider’s certifying that it and its subprocessors, as applicable: (a) no longer have the ability to Access any Student Data provided to Provider pursuant to the Service Agreement and/or (b) have destroyed all Student Data and APPR Data provided to Provider pursuant to this DPA. The Provider agrees that the timelines for disposition of data will be modified by any Assurance of Discontinuation, which will control in the case of a conflict.

Upon termination of this DPA, if no written request from the LEA is received, Provider shall dispose of all student data after providing the LEA with ninety (90) days prior notice.

The duty to dispose of student data shall not extend to Student Data that had been de-identified or placed in a separate student account pursuant to section II 3. - (4) LEA shall provide notice and facts surrounding the breach to the affected students, parents or guardians. Where a Breach of Student Data and/or APPR Data occurs that is attributable to Provider and/or its Subprocessors, Provider shall pay for or promptly reimburse LEA for the full cost of notification to Parents, Eligible Students, teachers, and/or principals.
- (5) In the event of a breach originating from LEA's use of the Service, Provider shall cooperate with LEA to the extent necessary to expeditiously secure Student Data.
- (6) Provider and its subprocessors will cooperate with the LEA, the NYSED Chief Privacy Officer and law enforcement where necessary, in any investigations into a Breach. PSNI, LLC is hereinafter referred to as "the company."

## 1.0 Purpose

The purpose of this policy is to outline the company's standards with regards to the protection of all data that is sent to, retrieved from, viewed, and/or otherwise handled by PSNI's Cloud Services.

## 2.0 Scope

This policy applies to the security, maintenance, and protection of all personnel and corporate systems used to store all data.

## 3.0 Policy

### 3.1 Physical Security

#### 3.1.1 Access Controls

Access controls are necessary to restrict entry to the company premises and security zones to only approved persons. Access to secure areas is protected through the use of electronic key fobs which are granted to select personnel.

#### 3.1.2 Alarm System

A security alarm system is a good way to minimize risk of theft, or reduce loss in the event of a theft. The company mandates the use of professionally monitored alarm system. The system must be monitored 24x7, with company personnel being notified if an alarm is tripped at any time.

#### 3.1.3 Fire Prevention

It is the company's policy to provide an environment that minimizes the risk of fire. Even a small fire can be catastrophic to computer systems. The following are the company's guidelines for protecting data:

- Fire, smoke alarms, and/or suppression systems must be used, and must conform to local fire codes and applicable ordinances.
- Electrical outlets must not be overloaded. Users must not chain multiple power strips, extension cords, or surge protectors together.
- Extension cords, surge protectors, power strips, and uninterruptible power supplies must be of the three-wire/three-prong variety.
- Only electrical equipment that has been approved by Underwriters Laboratories and bears the UL seal of approval must be used.
- Periodic inspection of electrical equipment must be performed. Power cords, cabling, and other electrical devices must be checked for excessive wear or cracks. If overly-worn equipment is found, the equipment must be replaced or taken out of service immediately depending on the degree of wear.
- A smoke alarm monitoring service must be used that will alert a designated company employee if an alarm is tripped during non-business hours.

### 3.2 Network Security

Just like protecting access to the physical areas where crucial equipment is housed, it's also important to protect the network access to that equipment. The company achieves this by having a separate VLAN for all cloud services traffic and maintaining strict firewall rules and logon policies that allow only certain machines to access that network. Also, only certain, designated, personnel are able to logon to those machines.

### 3.3 Data Encryption

Encryption, also known as cryptography, can be used to secure data while it is stored or being transmitted. It is a powerful tool when applied and managed correctly. As the amount of data the company must store digitally increases, the use of encryption must be defined and consistently implemented in order ensure that the security potential of this technology is realized.

#### 3.3.1 Applicability of Encryption

1. Data while stored The company encrypts the following data while it is being stored:

- All databases
- All SQL database backups
- All Server backups

2. Data while transmitted The company encrypts all data while it is being transmitted utilizing 2048-bit SSL certificates from a trusted Certificate Authority.

#### 3.3.2 Encryption Key Management

Key management is critical to the success of an implementation of encryption technology. The following guidelines apply to the company's encryption keys and key management:

Management of keys must ensure that data is available for decryption when needed

- Keys must be backed up
- Keys must be locked up
- Keys must never be transmitted in clear text
- Keys are confidential data
- Keys must not be shared
- Physical key generation materials must be destroyed within 5 business days.
- When user encryption is employed, minimum key length is 10 characters.

### 3.4 Data Isolation

When storing data for many discrete districts it's very important to keep their data separated from all the others so that there's no possibility of a user inadvertently accessing the data of someone else. The company ensures this isolation by maintaining separate databases for each district and further separating all data across several different instances of SQL Server. This isolation also allows for easy backups and restores on a per-district basis.

### 3.5 Backups

A backup policy is similar to an insurance policy - it provides the last line of defense against data loss and is sometimes the only way to recover from a hardware failure, data corruption, or a security incident. A backup policy is related closely to a disaster recovery policy, but since it protects against events that are relatively likely to occur, in practice it will be used more frequently than a contingency planning document. A company's backup policy is among its most important policies.

#### 3.5.1 Data to be Backed Up

Data to be backed up will include:

- All databases. Current Year and all Archives.
- All files that have been uploaded via SFTP.
- All files stored in user's "Documents" folder.

#### 3.5.2 Backup Frequency

Backup frequency is critical to successful data recovery. The company has determined that the following backup schedule will allow for sufficient data recovery in the event of an incident, while avoiding an undue burden on the users, network, and backup administrator.

- Data Backups
  - Every night
    - 2 Full SQL backups of Current Year database. One stored on premise and one stored in Microsoft's Azure cloud storage.
    - Daily Forever Forward backups
- Cloud Backup
  - Daily backup copies sent to remote backup site

#### 3.5.3 Off-Site Storage

Geographic separation from the backups must be maintained, to some degree, in order to protect from fire, flood, or other regional or large-scale catastrophes. Offsite storage must be balanced with the time required to recover the data, which must meet the company's uptime requirements. The company has determined that following off-site schedule will allow for sufficient data recovery in the event of an incident:

- Daily backup copies are sent off-site to a remote backup storage location

#### 3.5.4 Retention

When determining the time required for backup retention, the company must determine what number of stored copies of backup-up data is sufficient to effectively mitigate risk while preserving required data. The company has determined that the following will meet all requirements:

All Backups are saved for two (2) months.

### 3.6 Termination

It is the company's policy that a customer owns their data. In the event that access to Cloud Services is terminated, a standard PDF file set of their data will be made available to them via their SFTP site for a period of thirty (30) days. After that time, access to SFTP will be terminated as well and the account will be removed and all volatile data stored will be deleted.

Neither failure nor delay on the part of any Party in exercising any right, power, or privilege hereunder shall operate as a waiver of such right, nor shall any single or partial exercise of any such right, power, or privilege preclude any further exercise thereof or the exercise of any other right, power, or privilege.

5. **Severability.** Any provision of this DPA that is prohibited or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such prohibition or unenforceability without invalidating the remaining provisions of this DPA, and any such prohibition or unenforceability in any jurisdiction shall not invalidate or render unenforceable such provision in any other jurisdiction. Notwithstanding the foregoing, if such provision could be more narrowly drawn so as not to be prohibited or unenforceable in such jurisdiction while, at the same time, maintaining the intent of the Parties, it shall, as to such jurisdiction, be so narrowly drawn without invalidating the remaining provisions of this DPA or affecting the validity or enforceability of such provision in any other jurisdiction.
6. **Governing Law; Venue and Jurisdiction.** THIS DPA WILL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF THE LEA, WITHOUT REGARD TO CONFLICTS OF LAW PRINCIPLES. EACH PARTY CONSENTS AND SUBMITS TO THE SOLE AND EXCLUSIVE JURISDICTION TO THE STATE AND FEDERAL COURTS FOR THE COUNTY OF THE LEA FOR ANY DISPUTE ARISING OUT OF OR RELATING TO THIS DPA OR THE TRANSACTIONS CONTEMPLATED HEREBY.
7. **Successors Bound:** This DPA is and shall be binding upon the respective successors in interest to Provider in the event of a merger, acquisition, consolidation or other business reorganization or sale of all or substantially all of the assets of such business. In the event that the Provider sells, merges, or otherwise disposes of its business to a successor during the term of this DPA, the Provider shall provide written notice to the LEA no later than sixty (60) days after the closing date of sale, merger, or disposal. Such notice shall include a written, signed assurance that the successor will assume the obligations of the DPA and any obligations with respect to Student Data within the Service Agreement. The LEA has the authority to terminate the DPA if it disapproves of the successor to whom the Provider is selling, merging, or otherwise disposing of its business.
8. **Authority.** Each party represents that it is authorized to bind to the terms of this DPA, including confidentiality and destruction of Student Data and any portion thereof contained therein, all related or associated institutions, individuals, employees or contractors who may have access to the Student Data and/or any portion thereof.
9. **Waiver.** No delay or omission by either party to exercise any right hereunder shall be construed as a waiver of any such right and both parties reserve the right to exercise any such right from time to time, as often as may be deemed expedient.
