ARTICLE VII: MISCELLANEOUS

1. **Termination.** In the event that either Party seeks to terminate this DPA, they may do so by mutual written consent so long as the Service Agreement has lapsed or has been terminated. 2. **Effect of Termination Survival.** If the Service Agreement is terminated, the Provider shall destroy all of LEA's Student Data pursuant to Article IV, section 6.
3. **Priority of Agreements.** This DPA shall govern the treatment of Student Data in order to comply with the privacy protections, including those found in FERPA and all applicable privacy statutes identified in this DPA. In the event of a conflict between the SDPC Standard Clauses and the Supplemental State Terms, the Supplemental State Terms will control. Except as described in this paragraph herein, all other provisions of the Service Agreement shall remain in effect.
4. **Entire Agreement.** This DPA and the Service Agreement constitute the entire agreement of the Parties relating to the subject matter hereof and supersedes all prior communications, representations, or agreements, oral or written, by the Parties relating thereto. This DPA may be amended and the observance of any provision of this DPA may be waived (either generally or in any particular instance and either retroactively or prospectively) only with the signed written consent of both Parties. Neither failure nor delay on the part of any Party in exercising any right, power, or privilege hereunder shall operate as a waiver of such right, nor shall any single or partial exercise of any such right, power, or privilege preclude any further exercise thereof or the exercise of any other right, power, or privilege.
5. **Severability.** Any provision of this DPA that is prohibited or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such prohibition or unenforceability without invalidating the remaining provisions of this DPA, and any such prohibition or unenforceability in any jurisdiction shall not invalidate or render unenforceable such provision in any other jurisdiction. Notwithstanding the foregoing, if such provision could be more narrowly drawn so as not to be prohibited or unenforceable in such jurisdiction while, at the same time, maintaining the intent of the Parties, it shall, as to such jurisdiction, be so narrowly drawn without invalidating the remaining provisions of this DPA or affecting the validity or enforceability of such provision in any other jurisdiction.
6. **Governing Law; Venue and Jurisdiction.** THIS DPA WILL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF THE LEA, WITHOUT REGARD TO CONFLICTS OF LAW PRINCIPLES. EACH PARTY CONSENTS AND SUBMITS TO THE SOLE AND EXCLUSIVE JURISDICTION TO THE STATE AND FEDERAL COURTS FOR THE COUNTY OF THE LEA FOR ANY DISPUTE ARISING OUT OF OR RELATING TO THIS DPA OR THE TRANSACTIONS CONTEMPLATED HEREBY.
7. **Successors Bound:** This DPA is and shall be binding upon the respective successors in interest to Provider in the event of a merger, acquisition, consolidation or other business reorganization or sale of all or substantially all of the assets of such business. In the event that the Provider sells, merges, or otherwise disposes of its business to a successor during the term of this DPA, the Provider shall provide written notice to the LEA no later than sixty (60) days after the closing date of sale, merger, or disposal. Such notice shall include a written, signed assurance that the successor will assume the obligations of the DPA and any obligations with respect to Student Data within the Service Agreement. The LEA has the authority to terminate the DPA if it disapproves of the successor to whom the Provider is selling, merging, or otherwise disposing of its business.

8. **Authority.** Each party represents that it is authorized to bind to the terms of this DPA, including confidentiality and destruction of Student Data and any portion thereof contained therein, all related or associated institutions, individuals, employees or contractors who may have access to the Student Data and/or any portion thereof.
9. **Waiver.** No delay or omission by either party to exercise any right hereunder shall be construed as a waiver of any such right and both parties reserve the right to exercise any such right from time to time, as often as may be deemed expedient.

XtraMath Privacy Policy

Introduction

XtraMath is a not-for-profit, 501(c)3 organization, committed to protecting everyone's data privacy. This is our current Privacy Policy, which explains what user data we collect and how we use it. This policy and our Terms of Service are known collectively as our "Terms." We may change these Terms from time to time, but will provide notice as specified in the Terms of Service document.

Summary

- We collect the minimum amount of data required to operate our program.
- We use parents' and teachers' Personal Data to operate our program and, with their permission, to contact them about the program.
- We use students' Personal Data only to operate our program.
- We use de-identified student data to improve our program.
- We protect student data and have signed the Student Privacy Pledge.
- We do not advertise to students, and will not sell or rent their data in any way.
- We comply with applicable data privacy laws, such as FERPA, COPPA, CCPA, and GDPR.
- We never sell user data to third parties.

What data we collect

XtraMath collects the minimum amount of data required to operate our program. Below we summarize the data we collect on students, teachers, and parents. For an up-to-date list that shows what user data we collect, and how we use that data, see Appendix B, [Record of Data Processing](#).

DEFINITIONS

- **Data** includes all information connected with a person's or educational entity's use of XtraMath. This includes, but is not limited to, Personal Data, metadata, usage and performance data.
- **Personal Data** includes any data that can directly or indirectly identify an individual person. For example: an email address is always considered Personal Data; a student's grade level generally is not, but could be in conjunction with other information.
- **School** includes: individual schools; teachers acting on behalf of schools; school districts; and other local educational entities.

STUDENT DATA

We collect a student's first name, grade level, and program settings from the student's parent or teacher. As the student uses XtraMath, we collect usage and performance data, such as when they signed in, how many questions they answered correctly, and how long it took them to answer questions. If a student signs in via a single sign-on provider, such as Google, we collect an identifier from the provider that allows us to authenticate their sign-in. We do **not** collect the student email address that may be used for such a sign-in.

Other personal information about the student could be inferred from data that we collect. If a student account belongs to a class, for example, then we could infer that they attend a certain school.

PARENT DATA

We collect a parent's name and email address when they sign up for an account. If they sign up using a single sign-on provider, we also collect an identifier that allows us to authenticate their sign-in. We also collect some metadata and account settings, such as their time zone, the language they used to sign up, and their email preferences.

A parent supplies a password when they create an account. The password is hashed (scrambled) on the user's computer before it is ever sent to XtraMath. We do not have access to a user's original password, and cannot obtain it from the hashed version that we receive.

Other personal information about the parent could be inferred from data that we

collect. For example, we could infer that a parent whose account is linked to a student account is the parent or guardian of that student.

TEACHER DATA

We collect the same data for teacher accounts as parent accounts, with a few additions. For example, we collect the name by which students address the teacher, such as “Ms. Smith.” We also collect information about each class that the teacher creates, such as its name and its end date.

Other personal information about the teacher could be inferred from data we collect. For example, we could infer that the teacher works at a specific school based on their email address.

How We Use and Share Data

XtraMath processes user data in order to establish and maintain accounts, to provide educational activities to students, to compile and deliver reports about those activities to teachers and parents, and to understand and improve our program’s effectiveness. For an up-to-date list that shows the specific types of user data we collect, and how we use that data, see Appendix B, [Record of Data Processing](#).

STUDENT DATA

A student’s Personal Data is used internally to provide the student with appropriate educational activities, and to report their performance to their parents and teachers. We may access student Personal Data when providing customer support or investigating a reported issue with our program.

PARENT AND TEACHER DATA

A parent’s or teacher’s Personal Data is used internally for sign-in purposes and, with permission, to send them reports, announcements, and alerts related to XtraMath. We may access a parent’s or teacher’s Personal Data when providing them with requested support.

PARENT AND TEACHER DATA

We release Personal Data to third parties only in the following circumstances:

- *When the user requests the disclosure, such as a teacher sharing their class with another teacher.*
- *When the third party is a trusted service provider, and the data is required to adequately perform the service. We carefully vet our service providers and their security practices. For details, see Appendix A, [List of Third Party Providers](#).*
- *When required by law or a court order.*
- *In the event of a joint venture, sale or merger with a third party. The third party would be required to uphold our Terms, including our Privacy Policy for all existing accounts. We would provide advance notice before sharing data with that third party.*

XtraMath never releases Personal Data for any kind of third-party advertising.

USE OF DE-IDENTIFIED DATA

We may use de-identified usage data internally to analyze and improve our educational services, and to develop new products or features. We will never attempt to re-identify data that has been de-identified.

We may release de-identified data to educational researchers for the purpose of evaluating the effectiveness of our program.

We will not release de-identified data unless we are confident it cannot be re-identified, due to the removal of all direct and indirect personal identifiers, and the educational researchers have agreed in writing that they will not attempt to re-identify any individuals, classes, or Schools.

We may use aggregate de-identified data, such as the number of users of our service, for promotional purposes.

How We Securely Store Data

XtraMath takes security seriously. We implement a variety of industry-standard security measures to prevent any unauthorized access to our users' data. Such measures include, but are not limited to: data minimization; encrypting data in transit via HTTPS; hashing sensitive data, like passwords; deletion of outdated data; locked physical facilities; employee training; and administrator account security.

DATA STORAGE AND INTERNATIONAL TRANSFER

XtraMath stores and processes all data on servers in the United States. All servers that store XtraMath data are operated by trusted third party processors with whom we have contractual Data Processing Addendums. Our providers are certified under the [EU-US Privacy Shield and Swiss-US Privacy Shield](#), to better protect the data of our international users. For details, see Appendix A, [List of Third Party Providers](#).

DATA BREACH RESPONSE

While we use industry-standard practices to safeguard data, no service can guarantee absolute data security. We have a Breach Response Plan, which we will follow if we ever discover that Personal Data has been accessed improperly. As part of our response, we will: take action to stop further data loss or unauthorized access; investigate how the breach occurred; promptly contact all affected users via email; and contact law enforcement and government agencies when appropriate.

Data Retention and Deletion

XtraMath retains Personal Data only for as long as necessary to ensure continuity of math skill-building for students, and for the convenience of parents and teachers. We close user accounts, and delete all associated identifiable data, upon request. Most types of data are also deleted automatically after a certain amount of time has passed. For details, see Appendix B, [Record of Data Processing](#).

We may retain de-identified, aggregate data, which cannot identify any individual user, for research and program improvement purposes. Such data is deleted once no longer necessary for these purposes. We will provide certification of data deletion upon request.

DATA BREACH RESPONSE

Compliance with Data Privacy Laws

While we use industry-standard practices to safeguard data, no service can guarantee absolute data security. We have a Breach Response Plan, which we will follow if we ever discover that Personal Data has been accessed improperly. As part of our response, we will: take action to stop further data loss or unauthorized access;

investigate how the breach occurred; promptly contact all affected users via email; and contact law enforcement and government agencies when appropriate.

UNITED STATES

- **Children's Online Privacy Protection Act (COPPA):** As a non-profit organization, XtraMath is not subject to [COPPA](#). Nevertheless, we fully comply with the law as if we were subject to it. Children under the age of 13 may not create accounts. We only collect usage and performance data from students as a result of their performing educational activities, and we only use that data for educational purposes. If we gain actual knowledge that a child is using XtraMath without the appropriate consent, we terminate the account.
- **Family Education Rights Protection Act (FERPA):** Schools in the United States may provide student data to XtraMath while complying with [FERPA](#). When a School provides us with a student's Personal Data (or PII — Personally Identifiable Information) under the FERPA school official exemption, they remain in control of that data. XtraMath will only use and disclose that data as specified in our Terms and as allowed by law.
- **General Data Protection Regulation (GDPR):** XtraMath affirms and respects all data subject's rights under [GDPR](#). We minimize the data we collect and process, and use data only as described in this policy. For detailed information about what data we process, for what purpose, for how long, and our basis for doing so under the GDPR, see Appendix B, [Record of Data Processing](#). To object to processing, or to request data deletion or access, contact our Data Protection Officer at privacy@xtramath.org.

Cookies and Local Storage

XtraMath intends to discontinue the use of cookies by August 1, 2018.

XtraMath uses two types of cookies. These cookies can be cleared via browser settings — [aboutcookies.org](#) provides cookie management instructions for many specific browsers.

- **Google Analytics:** cookies allow us to see data such as the number of site visitors we get, and which pages they visit the most.
- **Vimeo:** cookies are stored when users play the videos on our homepage, and primarily keep track of the video player settings.

The XtraMath website uses “LocalStorage” files to remember a user’s sign-in information (if they choose to do so). We also use “SessionStorage” to improve performance during student activities by temporarily storing activity data on the device. Use of LocalStorage and SessionStorage is not required to use XtraMath. Users can remove remembered sign-in information at any time via the appropriate sign-in page. Users can also clear all LocalStorage by using the “Clear now” button on our [support page](#), or via browser settings.

The XtraMath mobile apps use application data for the same purposes as browser LocalStorage and SessionStorage. Users can still remove remembered sign-in information via the app’s sign-in pages. Uninstalling the app will remove all locally stored data. Some devices also allow users to clear locally stored app data without uninstalling the app.
