The student ID and the reason the student provides for exiting the exam is stored on a Respondus server so it can be accessed by the instructor.</p> <p>Data fields used by the Early Exit feature are:  - Student name: first and/or last  - Student identifiers: Vendor/App assigned student ID number OR Student app username (depends on the LMS)</p> <p>The second situation is if the student uses the “Help Center” feature in LockDown Browser. Within Help Center, a student can run a diagnostic test of their computing environment and forward the results by email, or open a support ticket with Respondus Support and include the results of the test. If the student chooses to use the “Help Center” to troubleshoot a technical issue, information about the user’s computer (e.g. OS version, LDB version, bandwidth, latency, etc.) will be transmitted to and stored on a Respondus server. If the student provides their name and email address for support purposes, this information will also be stored on a Respondus server. The student is warned that information is being sent to, and stored by, Respondus when using Help Center and the user must accept a Terms of Use that provides details of the data being sent and stored. The same Terms of Use for Help Center appears when LockDown Browser is installed for the first time.</p> <p>Data fields used by the Help Center feature are:  - Student name: first and/or last  - Student contact information: email  - Other: Information about their system (OS, CPU type, memory, running processes, etc.)</p> <p>In both cases, students can choose not to use these features in LockDown Browser, as they are not core functions of the product.</p> <p>Details on Data used in StudyMate: The primary data stored by StudyMate are the games and learning activities created by users (i.e. from course content). The database for StudyMate Campus stores the name of the student and the instructor; in the integration with Canvas, an internal ID to identify the user is also stored. StudyMate Campus does not store sensitive” information about users.</p> <p>Data fields used by StudyMate are:  - Student name: first and/or last  - Student identifiers: Vendor/App assigned student ID number OR Student app username (depends on the LMS)  - Other: Content (learning games) created by the student</p>	X
