Neither failure nor delay on the part of any Party in exercising any right, power, or privilege hereunder shall operate as a waiver of such right, nor shall any single or partial exercise of any such right, power, or privilege preclude any further exercise thereof or the exercise of any other right, power, or privilege.
5. **Severability.** Any provision of this DPA that is prohibited or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such prohibition or unenforceability without invalidating the remaining provisions of this DPA, and any such prohibition or unenforceability in any jurisdiction shall not invalidate or render unenforceable such provision in any other jurisdiction. Notwithstanding the foregoing, if such provision could be more narrowly drawn so as not to be prohibited or unenforceable in such jurisdiction while, at the same time, maintaining the intent of the Parties, it shall, as to such jurisdiction, be so narrowly drawn without invalidating the remaining provisions of this DPA or affecting the validity or enforceability of such provision in any other jurisdiction.
6. **Governing Law; Venue and Jurisdiction.** THIS DPA WILL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF THE LEA, WITHOUT REGARD TO CONFLICTS OF LAW PRINCIPLES. EACH PARTY CONSENTS AND SUBMITS TO THE SOLE AND EXCLUSIVE JURISDICTION TO THE STATE AND FEDERAL COURTS FOR THE COUNTY OF THE LEA FOR ANY DISPUTE ARISING OUT OF OR RELATING TO THIS DPA OR THE TRANSACTIONS CONTEMPLATED HEREBY.
7. **Successors Bound:** This DPA is and shall be binding upon the respective successors in interest to Provider in the event of a merger, acquisition, consolidation or other business reorganization or sale of

all or substantially all of the assets of such business. In the event that the Provider sells, merges, or otherwise disposes of its business to a successor during the term of this DPA, the Provider shall provide written notice to the LEA no later than sixty (60) days after the closing date of sale, merger, or disposal. Such notice shall include a written, signed assurance that the successor will assume the obligations of the DPA and any obligations with respect to Student Data within the Service Agreement. The LEA has the authority to terminate the DPA if it disapproves of the successor to whom the Provider is selling, merging, or otherwise disposing of its business.

8. **Authority.** Each party represents that it is authorized to bind to the terms of this DPA, including confidentiality and destruction of Student Data and any portion thereof contained therein, all related or associated institutions, individuals, employees or contractors who may have access to the Student Data and/or any portion thereof.
9. **Waiver.** No delay or omission by either party to exercise any right hereunder shall be construed as a waiver of any such right and both parties reserve the right to exercise any such right from time to time, as often as may be deemed expedient.

	<p>Data Security (PR.DS): Information and records (data) are managed consistent with the organization's risk strategy to protect the confidentiality, integrity, and availability of information.</p>	<p>Data-at-rest is protected. Data-in-transit is protected. Assets are formally managed throughout removal, transfers, and disposition. Adequate capacity to ensure availability is maintained. Protections against data leaks are implemented. Integrity checking mechanisms are used to verify software, firmware, and information integrity. The development and testing environment(s) are separate from the production environment. Integrity checking mechanisms are used to verify hardware integrity.</p>
	<p>Information Protection Processes and Procedures (PR.IP): Security policies (that address purpose, scope, roles, responsibilities, management commitment, and coordination among organizational entities), processes, and procedures are maintained and used to manage protection of information systems and assets.</p>	<p>A baseline configuration of information technology/industrial control systems is created and maintained incorporating security principles (e.g., concept of least functionality). A system Development Life Cycle to manage systems is implemented. configuration change control processes are in place. Back-ups of information are conducted, maintained, and tested. Policy and regulations regarding the physical operating environment for organizational assets are met. Data is destroyed according to policy. Protection processes are improved. Effectiveness of protection technologies is shared. Response plans</p>

		(Incident Response and Business Continuity) and recovery plans (Incident Recovery and Disaster Recovery) are in place and managed. Response and recovery plans are tested. Cyber security is included in human resources practices (e.g., deprovisioning, personnel screening). A vulnerability management plan is developed and implemented.
	Maintenance (PR.MA): Maintenance and repairs of industrial control and information system components are performed consistent with policies and procedures.	Maintenance and repair of organizational assets are performed and logged, with approved and controlled tools. Remote maintenance of organizational assets is approved, logged, and performed in a manner that prevents unauthorized access.
	Protective Technology (PR.PT): Technical security solutions are managed to ensure the security and resilience of systems and assets, consistent with related policies, procedures, and agreements.	Audit/log records are determined, documented, implemented, and reviewed in accordance with policy. The principle of least functionality is incorporated by configuring systems to provide only essential capabilities. Communications and control networks are protected. Mechanisms (e.g., failsafe, load balancing, hot swap) are implemented to achieve resilience requirements in normal and adverse situations.
DETECT (DE)	Anomalies and Events (DE.AE): Anomalous activity is detected and the potential impact of events is understood.	A baseline of network operations and expected data flows for users and systems is established and managed. Detected events are analyzed to understand attack targets and methods. Event data are collected and correlated from multiple sources and sensors. Impact of events is determined. Incident alert thresholds are established.
	Security Continuous Monitoring (DE.CM): The information system and assets are monitored to identify cybersecurity events and verify the effectiveness of protective measures.	The network is monitored to detect potential cyber security events. The physical environment is monitored to detect potential cyber security events. Personnel activity is monitored to detect potential cyber security events. Malicious code is detected. Unauthorized mobile code is detected. External service provider activity is monitored to detect potential cyber security events. Monitoring for unauthorized personnel, connections, devices, and software is performed. Vulnerability scans are performed.
	Detection Processes (DE.DP): Detection processes and procedures are maintained and tested to ensure awareness of anomalous events.	Roles and responsibilities for detection are well defined to ensure accountability. Detection activities comply with all applicable requirements. Detection processes are tested. Event detection information is communicated. Detection processes are continuously improved.
Function	Category	Contractor Response
	Response Planning (RS.RP): Response processes and procedures are executed and maintained, to ensure response to detected cybersecurity incidents.	Response plan is executed during or after an incident.
	Communications (RS.CO): Response activities are coordinated with internal and external stakeholders (e.g. external support from law	Personnel know their roles and order of operations when a response is needed. Incidents are reported consistent with established criteria. Information is shared consistent with response plans. Coordination with stakeholders occurs consistent with response plans. Voluntary information sharing occurs with external stakeholders to achieve

RESPOND (RS)	enforcement agencies).	broader cyber security situational awareness.
	Analysis (RS.AN): Analysis is conducted to ensure effective response and support recovery activities.	Notifications from detection systems are investigated. The impact of the incident is understood. Forensics are performed. Incidents are categorized consistent with response plans. Processes are established to receive, analyze, and respond to vulnerabilities disclosed to the organization from internal and external sources (e.g., internal testing, security bulletins).
	Mitigation (RS.MI): Activities are performed to prevent expansion of an event, mitigate its effects, and resolve the incident.	Incidents are contained. Incidents are mitigated. Newly identified vulnerabilities are mitigated or documented as accepted risks.
	Improvements (RS.IM): Organizational response activities are improved by incorporating lessons learned from current and previous detection/response activities.	Response plans incorporate lessons learned. Response strategies are updated.
RECOVER (RC)	Recovery Planning (RC.RP): Recovery processes and procedures are executed and maintained to ensure restoration of systems or assets affected by cybersecurity incidents.	Recovery plan is executed during or after a cyber security incident.
	Improvements (RC.IM): Recovery planning and processes are improved by incorporating lessons learned into future activities.	Recovery plans incorporate lessons learned. Recovery strategies are updated.
	Communications (RC.CO): Restoration activities are coordinated with internal and external parties (e.g. coordinating centers, Internet Service Providers, owners of attacking systems, victims, other CSIRTs, and vendors).	Public relations are managed. Reputation is repaired after an incident. Recovery activities are communicated to internal and external stakeholders as well as executive and management teams.
