Notwithstanding the foregoing, if such provision could be more narrowly drawn so as not to be prohibited or unenforceable in such jurisdiction while, at the same time, maintaining the intent of the Parties, it shall, as to such jurisdiction, be so narrowly drawn without invalidating the remaining provisions of this DPA or affecting the validity or enforceability of such provision in any other jurisdiction.
6. **Governing Law; Venue and Jurisdiction.** THIS DPA WILL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF THE LEA, WITHOUT REGARD TO CONFLICTS OF LAW PRINCIPLES. In the event that the Provider sells, merges, or otherwise disposes of its business to a successor during the term of this DPA, the Provider shall provide written notice to the LEA no later than sixty (60) days after the closing date of sale, merger, or disposal. Such notice shall include a written, signed assurance that the successor will assume the obligations of the DPA and any obligations with respect to Student Data within the Service Agreement. The LEA has the authority to terminate the DPA if it disapproves of the successor to whom the Provider is selling, merging, or otherwise disposing of its business.

8. **Authority.** Each party represents that it is authorized to bind to the terms of this DPA, including confidentiality and destruction of Student Data and any portion thereof contained therein, all related or associated institutions, individuals, employees or contractors who may have access to the Student Data and/or any portion thereof.

Alludo's Technical and Organizational Measures

Data Privacy and Security Areas		Alludo Measures
Physical Access Controls	The prevention, where commercially reasonable, of unauthorized persons from gaining access to the Services that is Processing Personal Data.	Data Processing: Alludo hosts its various Services offerings within EU-, US-, and Swiss- based storage service providers, depending on the Service used. Alludo maintains contractual relationships with its suppliers in order to provide the Services, which include legal agreements (including data protection agreements where applicable) and privacy policies in order to assure the protection of data processed or stored by these suppliers. Alludo suppliers are responsible for complying with our Supplier Code of Conduct. Alludo may require Processing of Personal Data by our affiliated legal entities, some of which are outside of the EU/EEA (or a region considered adequate by the EU Commission), specifically the US, Japan, Mauritius. Physical and environmental security: Alludo hosts its product infrastructure with multi-tenant service providers. The providers' physical and environmental security controls are audited for ISO 27001 compliance, among other certifications.
Logical Access Controls	Limiting access to Personal Data	Services access: A subset of Alludo's employees have access to the Services and to Personal Data via controlled interfaces. The intent of providing access to a subset of employees is to provide effective customer support, to troubleshoot potential problems, to support Alludo's marketing efforts, and to detect and respond to security incidents. Background checks: Alludo hosts its product infrastructure with multi-tenant service providers. The providers' physical and environmental security controls are audited for ISO 27001 compliance, among other certifications.
Data Access Controls	Ensuring processes are in places where personnel accessing a Service that Processes Personal Data:	Authentication: Alludo Customers are responsible for implementing their own password policies. Customers who interact with the Services via the user interface must authenticate before accessing the Service.

- Gain access only to Personal Data they are entitled to access in accordance with their access rights.
- Follow Controller instructions.
- Prevent, where commercially reasonable, the Processing of Personal Data from being used without authorization.

Authorization: Customer inputted data in Services is stored in multi-tenant storage systems accessible to Customers only via application user interfaces and application programming interfaces. Customers are not allowed direct access to the underlying application infrastructure. The authorization model in each of Alludo’s Services is designed to ensure that only the appropriately assigned individuals can access relevant features, views, and customization options. Authorization to data sets is performed through validating the user’s permissions against the attributes associated with each data set.

Preventing Unauthorized Services Use: Alludo implements industry standard access controls and detection capabilities for the internal networks that support its Services.

Access Controls: Network access control mechanisms are designed to prevent network traffic using unauthorized protocols from reaching the product infrastructure. The technical measures implemented differ between storage service providers and include Virtual Private Cloud (VPC) implementations and security group assignment, along with traditional enterprise firewall and Virtual Local Area Network (VLAN) assignment.

Data Transfer Controls

Ensuring, where commercially reasonable, that Personal Data cannot be read, copied, modified, or deleted without authorization during electronic transmission, transport, or storage on storage media, and that the target entities for any transfer of Personal Data by means of data transmission facilities can be established and verified.

In-transit: Alludo makes HTTPS encryption (also referred to as SSL or TLS) available on its login interfaces. Alludo’s HTTPS implementation uses industry standard algorithms and certificates.

At-rest: Alludo uses at-rest encryption wherever technically possible using industry standard mechanisms.

Network Security: The systems Processing Personal Data are protected against the risk of intrusion with the help of suitable software and hardware whose effectiveness and updating is checked periodically. The routers are appropriately configured to help secure the internal network from unauthorized external connections and to help ensure computer connections and data flow do not breach the logical access adjustment control of the systems. Amendments on the hardware-based network components or on their configurations need the acceptance of the designated person in charge and are subject to a change management process.

Firewall Security: Firewall configuration regulation defines acceptable ports. Only used ports and services are open. The access for the amendment of the firewall configuration is restricted to an internal team of security experts. Such team regularly examines critical firewall regulations.

Penetration testing: Alludo maintains relationships with industry recognized penetration testing service providers for annual penetration tests and ongoing monitoring. The intent of the

penetration tests is to identify and resolve foreseeable attack vectors and potential abuse scenarios.

Entry Controls	Establishing an audit trail to document whether Personal Data has been entered into, modified, or removed from systems, and by whom.	Detection: Alludo designed its infrastructure to log information about system behavior, traffic received, system authentication, and other application requests. Internal systems aggregate log data and alert appropriate employees of malicious, unintended, or anomalous activities. Alludo's internal teams, including security, operations, and support respond to known incidents. Response and tracking: Alludo maintains a record of known security incidents that includes a description of the incident, dates and times of relevant activities, and incident disposition through internal security processes. Suspected and confirmed security incidents are investigated by designated internal teams and appropriate resolution steps are identified and documented where applicable. For any confirmed incidents, Alludo takes steps to minimize Service damage and damage to or unauthorized disclosure of Personal Data. Communication: If Alludo becomes aware of unlawful access to Personal Data being Processed by Alludo, we will, as directed by applicable laws, 1) notify the affected Customers of the incident; 2) provide a description of the steps Alludo is taking or has taken to manage the incident; and 3) provide status updates to the Customer contact, as Alludo deems necessary. Notification of incidents, if any, will be delivered to one or more of the Customer's contacts in a form Alludo selects or as dictated by its contract with the Customer.
Instructions	Processing of Personal Data is done solely in accordance with the Customer's instructions.	Terminating Customers: Customer inputted data (defined below) which is submitted in the Services is purged upon a) Customer's actions through available self-help settings in Product, or b) written request, either through Alludo's Privacy Intake Form or by emailing a request to privacy@alludo.com, except in cases where Personal Data needs to be maintained by Alludo due to technical, compliance, or statutory requirements. "Customer inputted data " includes but is not limited to (i) the name, email address, phone number, online user name(s), and similar or related information submitted by Customers ;i) analytics data, (ii) logs, archived data or back-up data files, (v) other data that is not reasonably practicable for us to delete.
Availability Controls	Systems and processes that help to ensure Personal Data is protected against accidental destruction or loss.	Infrastructure Availability: The storage services providers use commercially reasonable efforts to ensure a minimum of 99.9% uptime. Fault Tolerance: Backup and replication strategies are designed to ensure redundancy and fail-over protections during a significant failure. Customer Data is backed up to multiple durable data stores

and replicated across multiple data centers/regions and availability zones.

Alludo’s Services are designed to ensure redundancy and enable failover. The server instances that support the products are also architected with a goal to prevent single points of failure. This design assists Alludo in maintaining and updating the Product applications and backend while limiting downtime.

Separations Controls	The Processing of Personal Data can be done separately,	Each Alludo Customer’s Personal Information is maintained separately, with Processing based on Customer’s instruction as a Controller.
Organizational Controls	Policies, Security Lead, Supervision, Inspection and Maintenance	Alludo has written policies in relation to data security and data protection, that outline the security and protection processes and procedures related to data security. The policies take into account the real risks the Personal Data is exposed to and take into account how security incidents are to be managed, and the various responsibilities of the organization and its personnel. The policies have been approved by the relevant persons in charge and have been adequately disseminated within the organization. A reassessment of the technical and organizational measures is performed on a regular basis in order to assure that the initial goals and the measures taken remain up-to- date so that improvements can be made if necessary. In case of reorganization or modification of infrastructure, security controls are updated. Personnel receive training that includes identifying and reporting suspected security threats. Alludo has a CISO, who is in charge of the implementation of the security policies and processes. The CISO possesses the necessary competences and is adequately trained. Centralized Documentation: Alludo has completed centralized documentation relating to security, which is complete and formalized, proportional to security needs, up-to-date at any time and accompanied by a directory at the disposal of properly authorized persons whenever necessary. Organizational Security: Alludo has made available sufficient and adequate organizational, technical, and financial resources to organize security. Guidelines on Personal Data protection have been provided to employees, along with training, to help ensure that all employees participating in the Processing of Personal Data are sufficiently informed about their duties and responsibilities during Processing operations.
