## **Background and Instructions**

**History of Agreement-** This agreement has been drafted by the Texas Student Privacy Alliance (TXSPA). The Alliance is a collaborative group of Texas school districts that share common concerns around student and data privacy. The Texas K-12 CTO Council is the organization that sponsors the TXSPA and the TXSPA is the Texas affiliate of the national Student Data Privacy Consortium (SDPC). The SDPC works with other state alliances by helping establish common data privacy agreements unique to the jurisdiction of each state. This Texas agreement was drafted specifically for K-12 education institutions and included broad stakeholder input from Texas school districts, statewide associations such as TASB, TASA, and TASBO, and the Texas Education Agency. The purpose of this agreement is to set standards of both practice and expectations around data privacy such that all parties involved have a common understanding of expectations. This agreement also provides a mechanism (Exhibit E- General Offer of Terms) that would allow an Operator to extend the ability of other Texas school districts to be covered under the terms of the agreement should an Operator sign Exhibit E. This mechanism is intended to create efficiencies for both Operators and LEAs and generally enhance privacy practices and expectations for K-12 institutions and for companies providing services to K-12 institutions.

Ellevation Education maintains a risk-based security program inclusive of physical, technical, and administrative safeguards designed to maintain the confidentiality, security, and availability of personal information in its care.

The security program is based on the NIST Cybersecurity Framework and addresses Policies and Procedures, Asset Management, Access Management, Cryptography, Physical Security, Operations, Business Continuity, Product, Cloud and Network Infrastructure, Third-Parties, Vulnerability Management, as well as Security Monitoring and Incident Response.

The program is supported at the highest levels of the company, and leverages a general risk management program, a vendor management program, user auditing, vulnerability scanning, security training and related practices to manage, and maintain consistent implementation and improvements across the organization.

Physical, administrative, and technical protections include, but are not limited to:

**Access:** Administrative access to environments storing PII is strictly controlled with multi factor authentication and auditing of user provisioning. The principle of *least privilege* is applied consistently to ensure that only authorized users with a direct need to handle PII have access. Production environments are scanned for network level vulnerabilities.

User access changes are authorized explicitly as part of a documented provisioning process. Actual user access levels are audited on a regular basis to ensure that access is not mistakenly granted.

**Encryption:** PII is encrypted in transit (TLS 1.2+) and at rest (AES 256).

**Storage:** Data is stored in a secure, cloud environment on Amazon Web Services ("AWS"). AWS documented best practices and configuration checking tools ensure that the production environment is configured in a resilient and secure configuration. Data is never copied from production to test environments.

Ellevation maintains a Data Classification Policy which mandates that we track customer data, maintain practices around data management that align to privacy concerns and be prepared to permanently delete student personal information in accordance with NIST 800-88.

The privacy related practices state that student personal information data will be deleted within 90 days of when the contract ends or is terminated. This includes backup and other retention sources.

**Third Parties:** Ellevation conducts a privacy and security assessment of all subcontractors that have access to student personal information prior to engagement, and ensures that its agreements with subcontractors include appropriate confidentiality, privacy and security obligations. **Incident Response:** Ellevation maintains an Incident Response Policy and Procedure in accordance with industry standards. This includes investigation, containment, mitigation, communications and post-incident review and remediation. Ellevation notifies customers of any breach of their personal information in accordance with all applicable laws.

**Employee On-Boarding and Training:** Ellevation performs a criminal background check on all employees. Ellevation employees with access to student data or teacher and principal data receive training on applicable data privacy laws. Privacy training is required and tracked both as part of new employee onboarding and on an annual basis for all employees.
