Neither failure nor delay on the part of any Party in exercising any right, power, or privilege hereunder shall operate as a waiver of such right, nor shall any single or partial exercise of any such right, power, or privilege preclude any further exercise thereof or the exercise of any other right, power, or privilege.

5. **Severability**. Any provision of this DPA that is prohibited or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such prohibition or unenforceability without invalidating the remaining provisions of this DPA, and any such prohibition or unenforceability in any jurisdiction shall not invalidate or render unenforceable such provision in any other jurisdiction. Notwithstanding the foregoing, if such provision could be more narrowly drawn so as not to be prohibited or unenforceable in such jurisdiction while, at the same time, maintaining the intent of the Parties, it shall, as to such jurisdiction, be so narrowly drawn without invalidating the remaining provisions of this DPA or affecting the validity or enforceability of such provision in any other jurisdiction.
6. **Governing Law; Venue and Jurisdiction**. THIS DPA WILL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF THE LEA, WITHOUT REGARD TO CONFLICTS OF LAW PRINCIPLES. In the event that the Provider sells, merges, or otherwise disposes of its business to a successor during the term of this DPA, the Provider shall provide written notice to the LEA no later than sixty (60) days after the closing date of sale, merger, or disposal. Such notice shall include a written, signed assurance that the successor will assume the obligations of the DPA and any obligations with respect to Student Data within the Service Agreement. 8. **Authority**. Each party represents that it is authorized to bind to the terms of this DPA, including confidentiality and destruction of Student Data and any portion thereof contained therein, all related or associated institutions, individuals, employees or contractors who may have access to the Student Data and/or any portion thereof.

Management controls

- The Provider maintains a comprehensive information security program with an appropriate governance structure (including a dedicated Information Security team) and written security policies to oversee and manage risks related to the confidentiality, availability and integrity of Personal Information.
- The Provider aligns its information security program and measures with industry best practices, such as the International Organization for Standardization (ISO)/International Electrotechnical Commission (IEC) 27001, Open Web Application Security Project (OWASP), and National Institute of Standards and Technology (NIST) 800 frameworks. These controls are distilled and incorporated

into an internal compliance framework that is applicable to all products and services.

- The Provider uses internal resources and third-party contractors to perform audits and vulnerability assessments and provide guidance on best practices for select systems containing Student Data. System assessments and network audits are performed regularly. Issues identified during audits are prioritized and remediated as part of ongoing security monitoring using a risk management methodology.
- The Provider's employees receive security and data privacy training when they start and regularly thereafter. Awareness campaigns are used to raise awareness about information security risks and our information security policies and procedures. Select staff, such as developers, receive additional security training tailored to their job role. Completion of training is tracked.
- New employees undergo background checks prior to onboarding, where permitted by applicable law, and sign a confidentiality agreement.
- Employees are required to comply with internal policies on the acceptable use of corporate IT assets. These policies address requirements on clean desk and secure workspaces, protecting system resources and electronic communications, protecting information, and general use of technology assets. The Provider's employees are made aware that non-compliance with these policies can lead to disciplinary action, up to and including termination of employment/contract.
- The Provider maintains a vendor risk management program to manage the security and integrity of its supply chain. The procurement process for third party service providers that have access to confidential information (including Student Data) includes a vendor security and privacy assessment review and a contract review by the Legal team.
- The Provider has a documented security incident response process for responding to, documenting, and mitigating security incidents and notifying its clients, authorities or other parties as required. The process is tested regularly.

Admission control

- The Provider employs appropriate physical safeguards to prevent unauthorized persons from gaining access to the premises where Student Data is collected, processed and used. Such premises may only be entered by the Provider and/or its agents.
- The Provider and its service providers implement physical security controls for the data centers used to store Student Data. These controls are commensurate with industry best practices and local regulations, which include 24x7x365 video monitoring, guards, secured ingress/egress, badged access, sign-in/sign-out logs, restricted access, and other best practices.
- The Provider uses appropriate measures to secure buildings, such as using access cards or fobs for employee access.
- The Provider uses appropriate measures to ensure that Student Data held in hardcopy are kept securely e.g., in locked rooms or filing cabinet. Generally, steps are taken to ensure that access to hardcopy Student Data is limited in the same way it would be on an electronic IT system i.e., access is limited to those individuals where it is necessary for them to have access in order for them to perform their job role.

Entry control

- The Provider uses appropriate measures to prevent unauthorized parties from accessing or using its systems containing Student Data.
- The Provider requires authentication and authorization to gain access to systems that process Student Data (i.e., require users to enter a user id and password before they are permitted access to such systems).
- The Provider has procedures in place to permit only authorized persons to access Student Data

internally or externally by using authentication procedures (e.g., by means of appropriate passwords), except as otherwise enabled by the LEA.

Access control

- The Provider employs appropriate measures to prevent individuals accessing Student Data unless they hold a specific access authorization.
- The Provider only permits access to Student Data which the employee (or agent) needs for his/her job role or the purpose they are given access to Provider's systems for (i.e., the Provider implements measures to ensure least privilege access to systems that process Student Data). System administration and privileged access is controlled and enforced on a need-to-know basis and is reviewed regularly.
- The Provider has in place appropriate procedures for controlling the allocation and revocation of access rights to Student Data. For example, having in place appropriate procedures for revoking employee access to systems that process Student Data when they leave their job or change role. Unnecessary and default user accounts and passwords are disabled on servers.
- Provider's systems containing Student Data are protected by user identifiers, passwords and role-based access rights. Special access rights are produced for the purposes of technical maintenance which do not allow access to Student Data.
- The Provider implements methods to provide audit logging to establish accountability by monitoring network devices, servers, and applications. Where applicable, aberrant activity generates alerts for investigation and/or action.
- All employees must use multi-factor authentication for remote access to IT assets within the corporate network.
- The Provider takes appropriate administrative safeguards to protect its services against external attacks, including, for example, deploying firewalls and using services to provide 24x7x365 security monitoring of its data centers to protect and defend against external security threats.

Transmission control

- The Provider employs appropriate measures to protect the confidentiality, integrity and availability of Student Data during electronic transmission.
- The Provider encrypts Student Data while in transit over the internet.

Input control

- The Provider maintains logging and auditing systems to monitor activity related to the input of Student Data.

Availability control

- The Provider protect Student Data in its possession against unintentional destruction or loss by implementing appropriate management, operations, and technical controls such as firewalls;

monitoring; and backup procedures. Example measures that may also be taken include mirroring of storage media, uninterruptible power supply (UPS); remote storage; and disaster recovery plans.
