- Protects the rights of employees, customers and partners
- Is transparent about how data is stored and processed
- Protects itself from risks associated with a data breach

Product Scope:

This Data Privacy Plan applies to your access and use of the following digital software, educational platforms and tools offered by Capstone (collectively, the “Capstone Digital Products”):

- PebbleGo (including add-ons)
- PebbleGo Create with Buncee
- Buncee (including all Buncee products)
- Capstone Interactive
- Capstone Connect

Our Commitment:

Capstone is the nation’s leading educational publisher for digital solutions, children’s books, and literacy programs for school libraries and classrooms! Home of the award-winning PebbleGo research database and the easy-to-use creation tool Buncee, Capstone has a passion for creating inspired learning and intellectual curiosity in children.

Capstone takes privacy and the privacy of students very seriously. *PebbleGo*, *Capstone Interactive*, and *Capstone Connect* do not have individual student accounts, but rather a single building account shared by all educators and students. *PebbleGo Create with Buncee*, *Buncee Classroom*, and *Buncee for Schools & Districts* do have individual educator and student accounts. Capstone does not require students to submit email, gender, or DOB. Capstone does not collect, sell, rent, or otherwise provide personally identifiable information (“PII”) to any third parties for advertising or marketing purposes. Buncee participates in the [iKeepSafe COPPA Safe Harbor Certification](#) program, and is a signatory of the [Student Privacy Pledge](#). Protecting students online is one of Capstone’s top priority.

They are not asked to submit student email or birth data. Under a *PebbleGo Create with Buncee* subscription or a *Buncee for Schools & Districts* subscription, classes, educator accounts, and student accounts are created by syncing the School/District's roster data through Google Classroom or Microsoft Office 365 with the Buncee application, or by manually uploading the applicable roster data in .csv format, and do not require the submission of student email or birth data. Furthermore, all passwords created or changed after 02/2017 are encrypted using bcrypt algorithm which is based on the secure blowfish encryption algorithm.

Measures to Protect Data:

Capstone Digital Products use HTTPS connections to secure transmissions. A combination of firewalls, security keys, SSL certificates, and non-default username/password credentials secure

data access. Additionally, the Buncee application has the following preemptive safeguards in place to identify potential threats, manage vulnerabilities and prevent intrusion:

- All security patches are applied routinely
- Server access logging is enabled on all servers
- Fail2ban (an intrusion prevention software framework that protects servers from brute-force attacks) is installed on all servers and will automatically respond to illegitimate access attempts without intervention from engineers
- Our database servers are not publicly accessible via the internet.
- SSH key-based authentication is configured on all servers

Capstone Digital Products use HTTPS connections to secure transmissions. The HTTPS you see in the URL of your browser means when you go to the website, you're guaranteed to be getting the genuine website. With HTTPS in place, all interactions with Capstone Digital Products will be undecipherable by an outside observer. They are unable to read or decode data. HTTPS is the same system that many sensitive websites, like banks, use to secure their traffic.

Capstone Digital Products use SSL security at the network level to ensure all information is transmitted securely. All content (i.e., photos, video, audio, and other content added to your Buncees in PebbleGo Create and the Buncee products) is encrypted at rest. All passwords are encrypted using modern encryption technologies.

Account information is stored in access-controlled VPCs operated by industry leading partners. All user information is stored redundantly and backed up in geographically distributed data centers. We utilize multiple distributed servers to ensure high levels of uptime and to ensure that we can restore availability and access to personal data in a timely manner.

The Buncee application is hosted on cloud servers managed by Amazon Web Services and Digital Ocean, both of whom are compliant with security standards including ISO 27001, SOC 2, PCI DSS Level 1, and FISMA. Data centers are conditioned to maintain atmospheric conditions at optimal levels. Personnel and systems monitor and control temperature and humidity at appropriate levels. These data centers are staffed 24/7/365 with onsite security to protect against unauthorized entry. Each site has security cameras that monitor both the facility premises as well as each area of the datacenter internally. There are biometric readers for access as well as at least two factor authentication to gain access to the building. Furthermore, physical access to our servers would not allow access to the actual data, as it is all protected via encryption.

You can learn more about the security practices of the cloud hosting providers here: Overview of Security Processes at AWS (<https://aws.amazon.com/whitepapers/overview-of-security-processes/>) and Security at Digital Ocean (<https://www.digitalocean.com/security/>).

Data Storage, Retention, and Access:

User data is stored in secure and managed cloud repositories, accessible only to select development team members via secure connections. Background checks are performed on all

employees. Data is backed up routinely, and securely in our cloud infrastructure. Stale data copies are permanently purged. All system identifiers for *user*, *Buncee*, *class* and other entities are randomly generated hexadecimal strings and stored as binary strings. Furthermore, sensitive data like passwords created or changed after 02/2017 are encrypted using modern encryption techniques.

All user data, including file uploads are stored in our secure cloud VPCs.

The Buncee application does not store any user data outside of the United States. However, the Buncee application utilizes Amazon's content delivery network, *CloudFront* to securely deliver rich media to its viewers across the world, which might be temporarily cached by the edge servers.

Data Breach, Incident Investigation and Response:

Capstone has implemented the following procedure to manage a data breach:

Breach Investigation: A systematic approach to making a definitive determination as to whether a breach has taken place led by the VP of Information Technology and the Director of Business Systems Information Technology is created to investigate a potential breach. The response team will be tasked with isolating the affected systems, including taking the part or the entire site offline.

Remediation Efforts: Upon identification, the response team will review the access logs and the monitoring software to figure out the cause of the breach. We will also consult experts at the cloud hosting service providers to help with the issue. Once the cause is identified, we will apply and monitor the fix and gradually bring the site online. The response team will also reset all session tokens for its users which will require that they log in again. Access tokens are valid for 24 hours in order to prevent unauthorized access.

Internal Communication Plan: If it has been determined a breach occurred, the VP of Information Technology and the Director of Business Systems Information Technology will inform the President and CFO and explain what is being done to remediate the issue. After a solution has been implemented, an incident report detailing the cause, extent of damage, steps taken and recommendations to avoid in the future will be written by the response team and shared internally.

Public Notification of Breach: After remediating the issue, the marketing team will work on informing all affected users about the breach and its severity. A brief statement will be shared via email explaining the incident and the solution will be sent within 72 hours after remediation is finalized. Additionally, the response team will monitor the dedicated email address privacy@capstonepub.com to address any follow-on questions.

Capstone has adopted the following backup-and-restore process:

- Use up-to-date images to spawn new servers. (if applicable also create a new load balancer)
- Use the latest hot backup of the database to restore user data
- Update the DNS records to point to the new load balancer
- Verify the backup-and-restore process was successful

To protect against denial-of-service attack, Capstone has also established the following safeguards:

- Robust alert & notification system in place to notify sudden traffic changes
- Reverse proxy is used to prevent DDoS attack
- Load-balancing is used to help distribute the load to multiple servers
- Web Application Firewall (WAF) can be configured to block IP ranges
- Notification system to alert instances of bot-like behavior from a user(s)

A typical incident response includes a combination of the following:

Identification: The response team is initiated to determine the nature of the incident and what techniques and resources are required for the case.

Containment: The team determines how far the problem has spread and contains the problem by disconnecting affected systems and devices to prevent further damage.

Eradication: The team investigates to discover the origin of the incident. The root cause of the problem is determined and any traces of malicious code are removed.

Recovery: Data and software are restored from clean backup files, ensuring that no vulnerabilities remain. Systems are monitored for signs of weakness or recurrence.

Data Collection and Use:

Data is collected in order to administer your account with us and improve and customize the service we provide to you. We do not sell, rent, or otherwise provide your personally identifiable information to any third parties for marketing or advertising purposes. We will not collect, use, or share such information for any purposes beyond educational/school purposes, or as authorized by the district/school, educator, student, or parent.

Under a Buncee Classroom subscription, educator accounts require the completion of the registration form which requests name, email address, gender, date of birth, country, state (if applicable), name of school, unique username, and password. Student sub-accounts and their unique usernames/passwords can only be created manually, by CSV upload, or by class code issued by the subscriber (educator) of the *Buncee Classroom* plan. Educators are not required to submit student email, gender, or birth data. Under a *PebbleGo Create with Buncee* subscription or a *Buncee for Schools & Districts* subscription, classes, educator accounts, and student accounts are created by syncing the School/District's roster data through Google

Classroom or Microsoft Office 365 with the Buncree application, or by manually uploading the applicable roster data in .csv format.

The purpose of data processing is to allow Capstone to provide the requested Services to the District and perform the obligations under our Agreement. More specifically, the purpose of processing data is to enable school oversight and ensure appropriate structure and interaction within a school account. The processing of data enables the interaction, communication, creation and sharing within the classroom/school/district account; allows educators and/or administrators to monitor accounts, set permissions and deliver educational content; allows educators to differentiate and personalize a student's educational experience; and provides the admin-educator-student hierarchy within the account. Capstone requires data capture and use for the following reasons:

- To confirm the identity of students and educators/administrators
- To provide educational services and content
- To allow subscribers to create and manage classes, personalize and differentiate instruction, and monitor and assess student progress
- To allow subscribers to monitor and safeguard student welfare
- To allow subscribers to set creation and sharing permissions and privacies schoolwide
- To inform existing subscribers about feature updates, site maintenance, and programs/initiatives (does not include subaccounts)

Capstone does not sell, rent, or otherwise provide personally identifiable information to any third parties for marketing or advertising purposes. Additionally, Capstone will not utilize subcontractors without a written contract that requires the subcontractors to adhere to, at a minimum, materially similar data protection obligations imposed on Capstone by state and federal laws and regulations.

Access and Disposal:

A parent, eligible student, educator or principal may challenge the accuracy of the data that is collected. They are entitled to ask the following:

- What information Capstone holds about them and why
- If there is data that is inaccurate that may need to be corrected
- How they can gain access to that information
- How they can keep it up to date
- How Capstone is protecting their data

All requests should be made via email at privacy@capstonepub.com. The Data Privacy Administrator will then verify the identity of anyone making a request before handing over any information.

Account information will be retained by Capstone only to the extent necessary to fulfill its obligations under the Agreement and Capstone may take steps to destroy such data when it determines, in its discretion, that the data is no longer needed for the purposes for which it was disclosed. In any event, Capstone reserves the right to delete and destroy account data, including but not limited to User Content and information from or related to Education Records, thirty-six (36) months from the date of the earliest to occur of the following: (i) termination or expiration of this Agreement, (ii) your failure to pay fees in accordance with the terms of this Agreement, or (iii) a user account shows no user activity for a period of six (6) months. Capstone may retain copies of data related to your use of the Capstone Digital Products, including User Content, to the extent it deems is necessary to comply with applicable laws, resolve disputes, enforce its legal agreements or policies, or verify and validate any requests made by you. It is the educator's and/or the school/district's responsibility to maintain and retain any student information, including Education Records, pursuant to and in accordance with any laws, rules, regulations, policies, or obligations applicable to you and/or your School/District.
