Jill,

Thanks for your email.

The agreement states "Vendor will receive student data and/or teacher or principal data that is protected under New York Education Law Section ."

The quote is for our desktop software for teachers, Infinite Algebra 1 through Infinite Calculus. This software is used by teachers to create and print worksheets. Students do not use the software. No student data is collected. No protected teacher or principal data is collected.

We also offer "Kuta Works". Kuta Works allows teachers to post assignments from our desktop software so their students can complete the assignments online. However, your district is not using Kuta Works.

Please let me know if the agreement must still be signed. If so, I would need to note this information.

Thanks again,

Matt

Kuta Software LLC

No Fluff. No Jargon. Just Math.
