Dear parents/guardians:

Under New York State's newly passed Educational Law Section 2-d, school districts are required to procure a contract from any software vendor we use for educational or administrative purposes that collects personally identifiable information (PII) for students.

At times, we run into difficulty obtaining a contract with certain software vendors. One such instance is **Care Connect**, which is an app-based tool for monitoring glucose levels.

Since we were unable to obtain a contract with Care Connect, we cannot use student PII with their software. To work around this, we are asking you to provide parental consent to use this app so that our Nursing and appropriate staff can view your child's glucose levels on district-owned devices during the school day.

Please sign the form on the reverse side of this letter and return it to your student's principal.

Sincerely,

Tracy Falvo
