Hi Jennifer,

I hope all is well! I appreciate your patience while my legal team reviewed the documents. They responded saying that the solutions at SolarWinds are on-premise and are deployed in the customer's environment. Therefore, it is the customer that controls their data and not SolarWinds and the data sharing agreement is not applicable. Additionally, the governing End User License Agreement contains confidentiality obligations, so both parties are already bound by confidentiality provisions.

Please let me know if there is anything else I can help with!

Thanks,

Danh
